I. INTRODUCTION

This Well Site Investigation Report is a part of an ongoing project proposed by the Army to construct a public water system to serve residential areas surrounding the Badger Army Ammunition Plant (BAAAP) whose private well water quality may be affected by previously identified groundwater contaminant plumes originating from BAAAP. The proposed water system will include two wells, a water distribution system, water storage facilities, and water treatment facilities. **Figure 1** shows the general location of the proposed area on a USGS location map.

This Well Site Investigation Report is intended to meet the requirements of Wisconsin Administrative Code NR 811.16 and is submitted for review and approval of two proposed municipal well sites (Final Well #1 and Final Well #2) in a proposed public water system. Previous efforts to implement a public water system include construction, test pumping, water quality sampling, and geologic logging of four Test Borings in the region of the proposed final well sites. This report also recommends construction of two test wells, construction of monitoring well nests, test pumping of each test well, and water quality analysis of both test wells.

Note on Well Naming Convention: The four “Test Borings”, which have been completed are referred to as Test Borings 1, 2, 3, and 4 throughout this report. The three “Test Well” sites, which this report seeks the approval of, are referred to as Test Wells A, B and C. The two “Final Well” sites, which have yet to be determined, are referred to as Final Wells 1 and 2.

FIGURE 1

II. BACKGROUND

A. Existing Community Water Sources

Existing water users within the service area (Figure 2) currently obtain their water from private groundwater wells of varying depths and type. However, low levels of groundwater contamination from BAAAP have been detected in several area wells. In higher density residential areas within the service area, it is common for multiple residents to share a single well. Typically these single and multiple dwelling wells are 6 inch diameter wells extending to depths ranging from 20 to 300 feet deep. Well construction types include shallow screened wells developed in the sand and gravel formations (which extend from 20 to 200 foot depths) and bedrock wells. The bedrock wells terminate in either a gray shale or sandstone bedrock formation. Residential wells located to the northeast of the BAAAP generally encountered quartzite bedrock at depths near 100 feet. These quartzite formations are generally non-water bearing and because of this are generally drilled deeper (to depths of 600 feet) to provide water storage.

A high capacity well exists within the service area at the Summer Oaks Cove Development to serve that residential area. This well was constructed in 2003 and consists of a 372 foot deep, 8-inch well cased and grouted to a depth of 280 feet. This well was designed for a current service area including approximately 33 residents and 15 condominium units. It is estimated that the well can produce approximately 90 gallons per minute (gpm). Within the same development, two additional wells exist to serve the remaining portion of the development consisting of approximately 80 condominium units and a restaurant.

B. Water Distribution System

A water distribution system will be designed to serve residents within the proposed service area, shown in **Figure 2**.

C. Test Borings

Four Test Borings, shown on **Figure 2** and **Appendix A-1**, were recently constructed to evaluate sites northeast of groundwater contamination originating from BAAAP. Each Boring consisted of a six-inch diameter steel casing extended through the sand and gravel aquifer into Mount Simon formation, with the remainder of the borehole open to Precambrian granite. Each Test Boring was pumped for approximately four hours or longer to estimate well specific capacities. Water samples were collected and analyzed for select water quality

parameters. Table 1-1 summarizes each Test Boring's physical characteristics. Water quality parameters are summarized in Table 1-2. More complete water quality data is located in **Appendix A**.

Table 1-1 – Test Boring Physical Data Summary

	Test Boring			
	#1	#2	#3	#4
Ground Elevation	829	824	809	837
Depth to Casing (feet)	245	240	195	225
Depth to Shale/ Dolomite (feet)	230	236	192	225
Depth to Sandstone (feet)	343	450	240	458
Depth of Boring (Precambrian interface – feet)	465	455	479	531
Open Borehole (feet)	122	219	239	73
Specific Capacity (Gallons per minute per foot of drawdown)	6	2.8	11	3.9

Table 1-2 – Test Borings Water Quality Analysis

Parameter	MCL/ Aesthetic Limit	Test Boring			
		#1 10/25/10	#2 11/16/10	#3 7/13/11	#4 4/4/12
Arsenic (µg/L)	10	ND	2.2	ND	ND
Calcium (mg/L)		74	72.2	66.7	69.6
Chloride (mg/L)	250	9.36	10.3	8.1	5.91
Hardness (mg/L)		314	315	294	306
Iron (mg/L)	.300	0.772	1.95	0.377	0.214

Manganese (µg/L)	50	27.6	37.2	28.1	19.5
Radium (Combined 226 + 228) (pCi/L)	5	1.86	2.9	3.45*	2.00*

*Average based on three samples spaced 24 hours apart.

Cuttings from Test Boring construction were collected and submitted to the Wisconsin Geological & Natural History Survey (WGNHS) for geologic logging. In all four Borings, unconsolidated sand and gravel outwash was underlain by the Mount Simon formation which begins at depths ranging from 190 to 240 feet below ground. The Mount Simon formation consisted of an upper layer of well cemented dolomite and shale with some layers of sandstone, and then a lower layer of predominant sandstone. Borings were terminated at depths ranging from 450 to 510 feet below surface. WGNHS logs for each Boring are included in **Appendix A**.

During test pumping, some Test Borings drew water from the entire Mount Simon formation (both upper dolomite layers and lower sandstone layers), and other tests were performed with a packer assembly to isolate the lower sandstone layers.

Test Boring # 1 was constructed near the intersection of Highway 78 and Goette Road. Test Boring # 1 was initially pumped at 55 gallons per minute (gpm) for two hours with a drawdown of 9.3 feet, resulting in a specific capacity of 5.9 gpm/ft. Upon recovery, a packer installed at a depth of 360 feet was inflated to create a seal at the top of the Mt. Simon sandstone. The Test Boring was again pumped at 55 gpm for two hours. The pumping caused a drawdown of 0.0 feet above the packer, which indicates the presence of an aquitard in the formation. No drawdown was recorded below the packer either. Water quality from Test Boring # 1 met all limits for primary contaminants sampled, but contained iron above the secondary (aesthetic) standard and manganese near the secondary standard. A final well developed in the vicinity of Test Boring # 1 could be a viable groundwater source for the proposed sanitary district, but may require iron and manganese removal facilities.

Test Boring # 2 was constructed near the intersection of Highway 78 and Highway 113. Test Boring # 2 was pumped at 70 gpm and drawdown was 26 feet and increasing after 45 minutes of test pumping. This indicates a specific capacity of less than 3 gpm/ft. Water quality from Test Boring # 2 met all limits for primary contaminants sampled, but contained iron significantly above the secondary standard, and manganese near the secondary standard. Due to high iron concentrations and increased drawdown during test pumping, Test Boring # 2 is not considered a viable location for a groundwater source.

Test Boring # 3 was constructed in a proposed rural residential addition to the Foster's Shores Development. Test Boring # 3 was originally test pumped in 2010, but contained iron slightly above the secondary (aesthetic) standard and manganese near the secondary standard. Water pumped from Test Boring # 3 also contained combined radium 226 and 228 concentrations above the maximum contaminant limit of 5 pCi/L. As a result of radium concentrations, and to more accurately establish specific capacities, additional investigation was completed at Test Boring # 3.

Geophysical gamma logging, shown in **Appendix B**, was performed by the Wisconsin Geological and Natural History Survey (WGNHS). Gamma logging indicated areas of bedrock, notably in the upper shale/dolomite layers that emit higher gamma radioactivity. Gamma radioactivity is not a definitive indicator of radium emitting rock formations, however, increased gamma radiation between depths of 200 and 250 feet below the casing correspond with shale that can produce radium-containing water.

Additional pumping of Test Boring # 3 occurred in July 2011. To eliminate potential radium containing water produced from shale formations, an inflatable packer was installed at 249 feet below the top of casing. Approximately three feet of grout was also placed in the bottom of the borehole to ensure no contact with Precambrian granite that could also produce radium containing water. Test Boring # 3 was pumped at a rate of 100 gallons per minute for 72 hours. Water samples were collected at 24, 48, and 72 hours for radiochemistry analysis. The average combined radium concentration of the three samples was 3.45 pCi/L, which is below the maximum contaminant level (MCL) of 5.

Water surface elevations were recorded during the 72 hour test from above and below the inflated packer to evaluate the level of hydraulic connectivity between the unconsolidated aquifer and the lower sandstone aquifer. Separate altitude gauges were connected to an airline installed above the packer, and another airline installed below the packer. The initial upper and lower altitude gauge readings prior to packer inflation were 224 and 285 feet, respectively. After the packer was inflated, the upper altitude gauge reading remained unchanged, but the lower reading increased to 294 feet, indicating an upward hydraulic gradient through the sandstone formation.

The initial upper altitude gauge reading of 224 feet (above the packer) remained unchanged throughout the duration of the pump test. The lower reading decreased from 294 to 286 feet after 12 hours of pumping and remained stable until completion of the test. **Figure 3** shows drawdown versus time for the upper and lower aquifers.

The additional investigation performed on Test Boring # 3 indicated that radium did not exceed the MCL for combined radium 226 & 226 during the extended pump test. Test pumping also demonstrated the shale and dolomite layers present in the upper sandstone formation are acting as a confining layer, and therefore the sandstone aquifer in this localized region is acting as a confined aquifer. This confining layer limits the hydraulic connectivity between the sandstone aquifer and the unconsolidated sand and gravel aquifer above.

Test Boring #4 was constructed approximately 200 feet southeast of the intersection of Highway 78 and Mattson Road near a barn and agricultural fields. Test Boring #4 was pumped at rate between 96 gpm and 101 gpm for a total of 72 hours. The maximum drawdown reported was 25 feet, which yields a calculated specific capacity of 3.9 gpm per foot of drawdown. Water quality from Test Boring #4 met all limits for primary and secondary contaminants sampled. These results suggest that a final well developed at this location would have the best water quality of the test boring sites.

WGNHS also performed geophysical gamma logging at Test Boring #4 (See **Appendix B**). Gamma logging indicated the Mt. Simon sandstone present between 458 and 505 feet. The gamma signal (red shaded log, center) suggests Precambrian starts around 510 feet. The spinner flow log (green, left), combined with the caliper log (black, center) indicate that a fracture at 487 feet is producing approximately 45 gpm ambient upward flow. This upward flow exits the borehole at three fractures at 256, 241, and 236 feet.

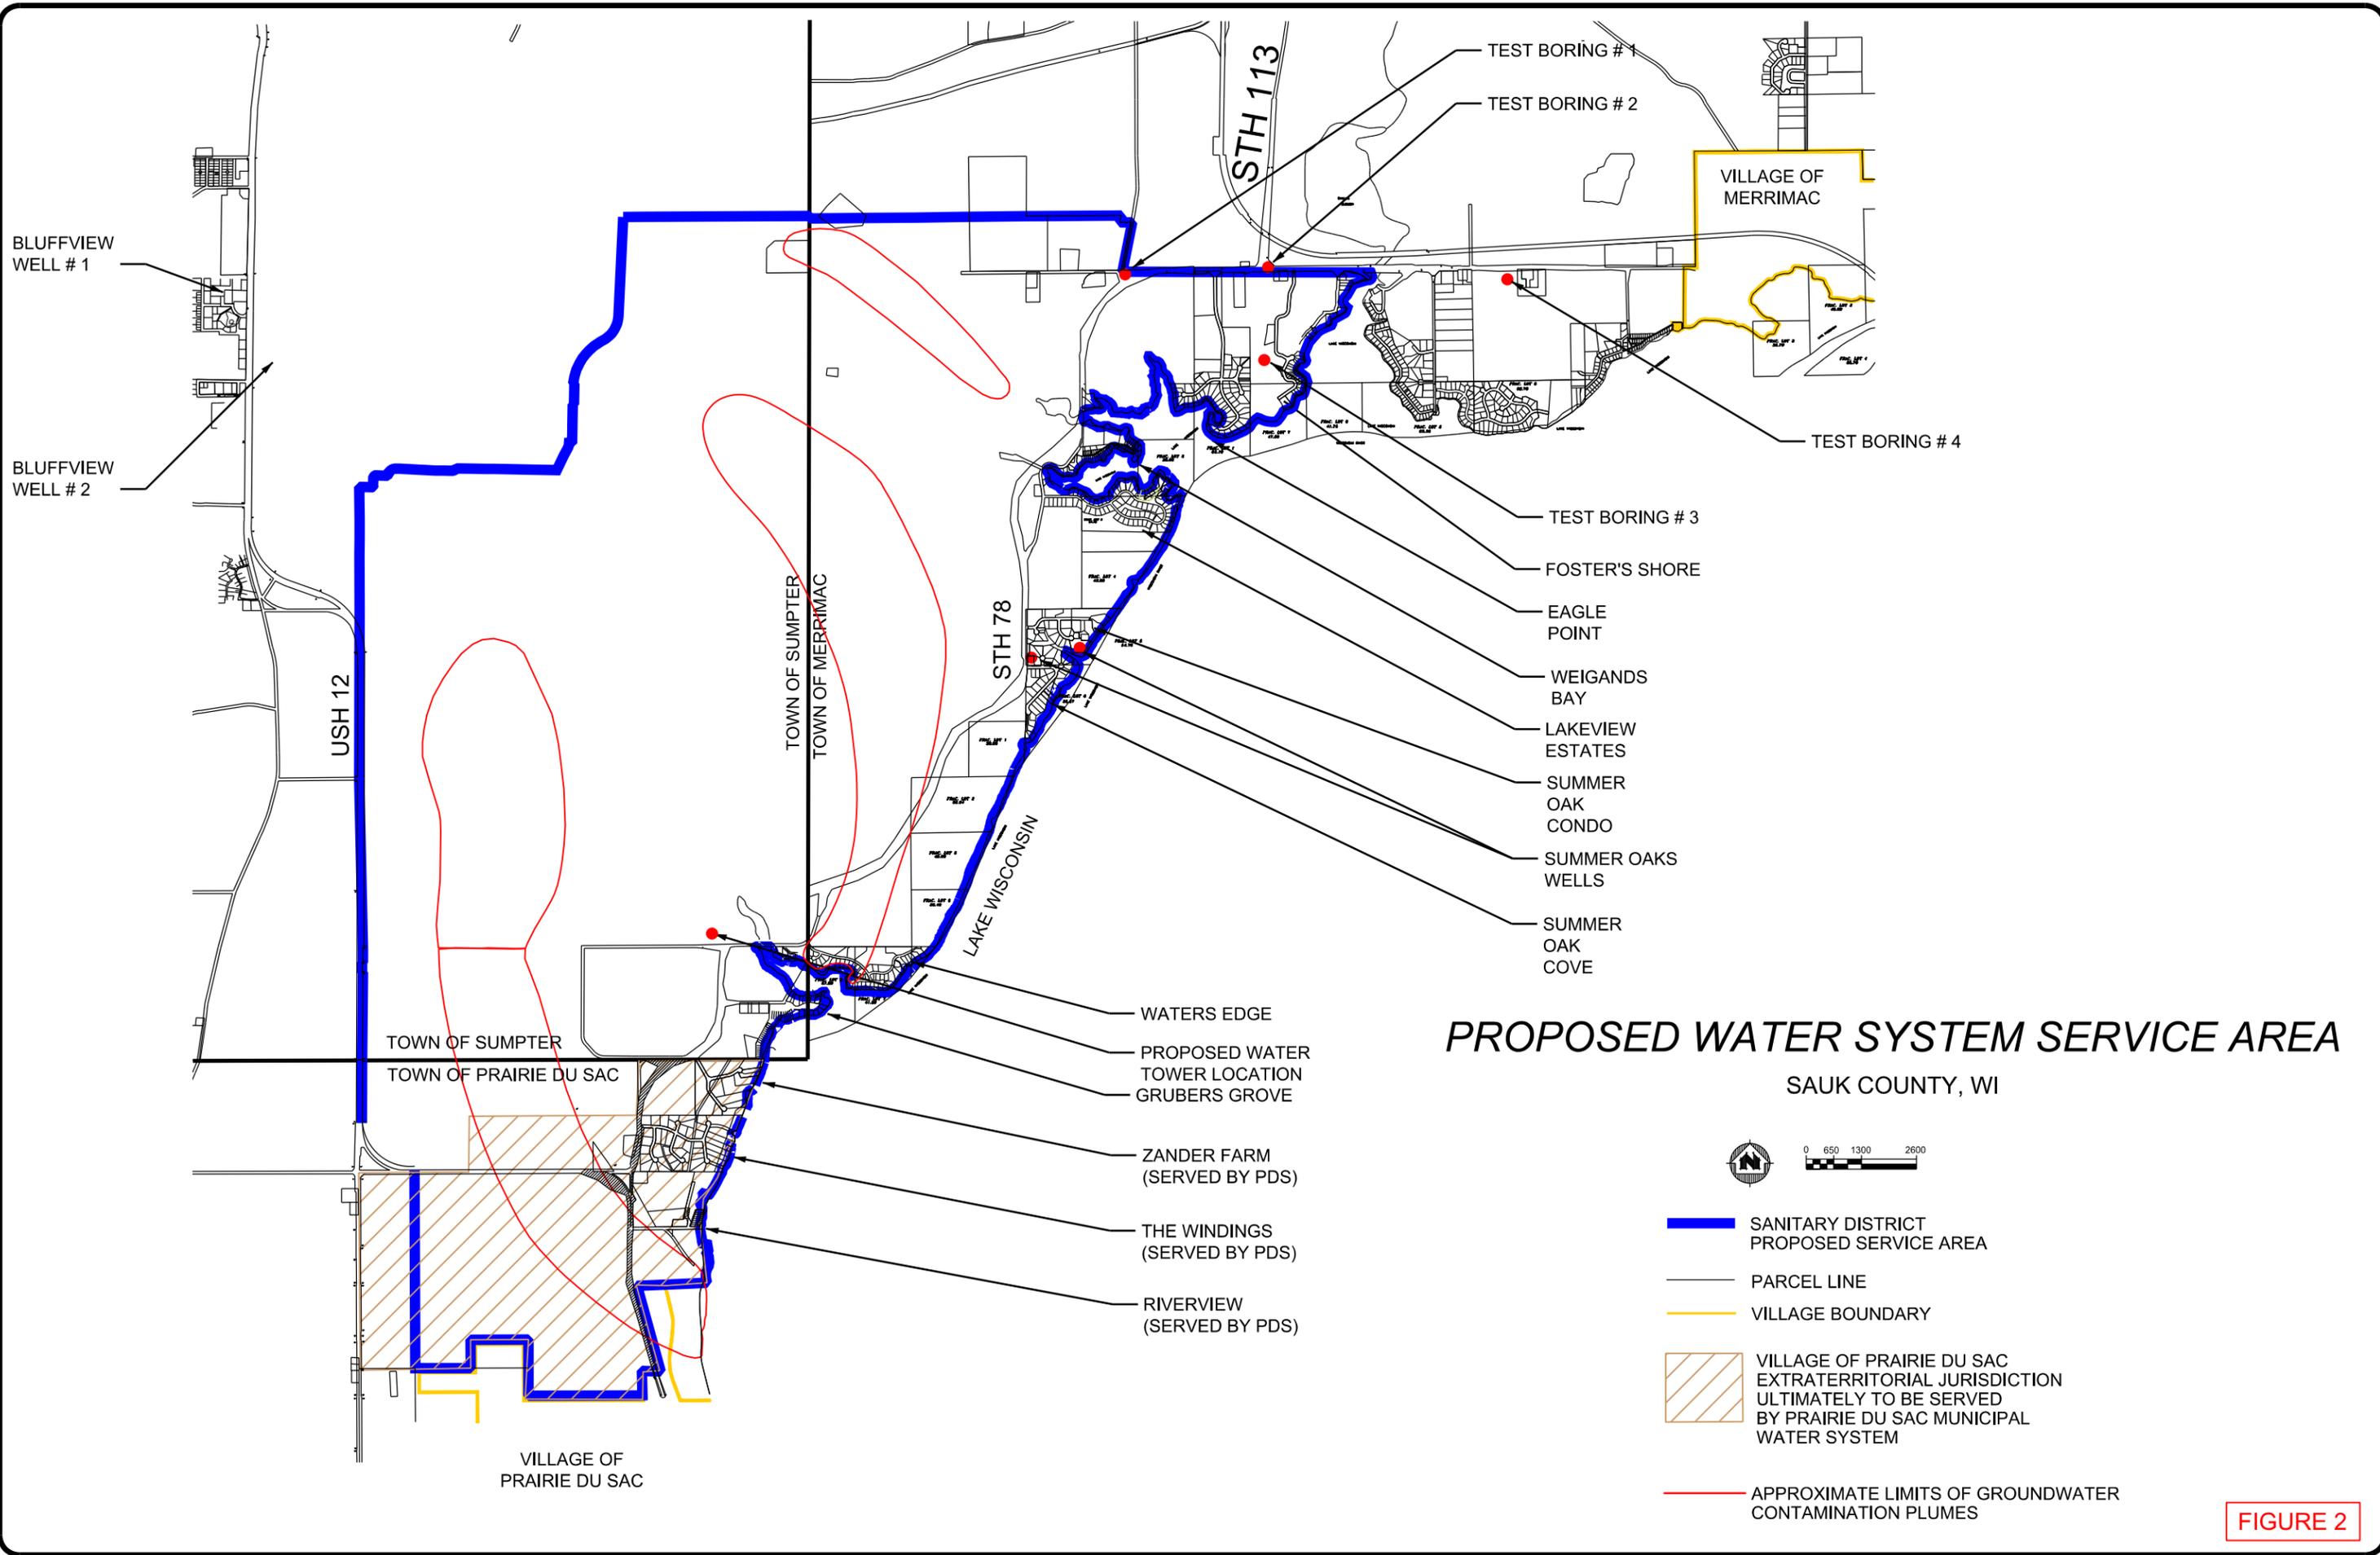

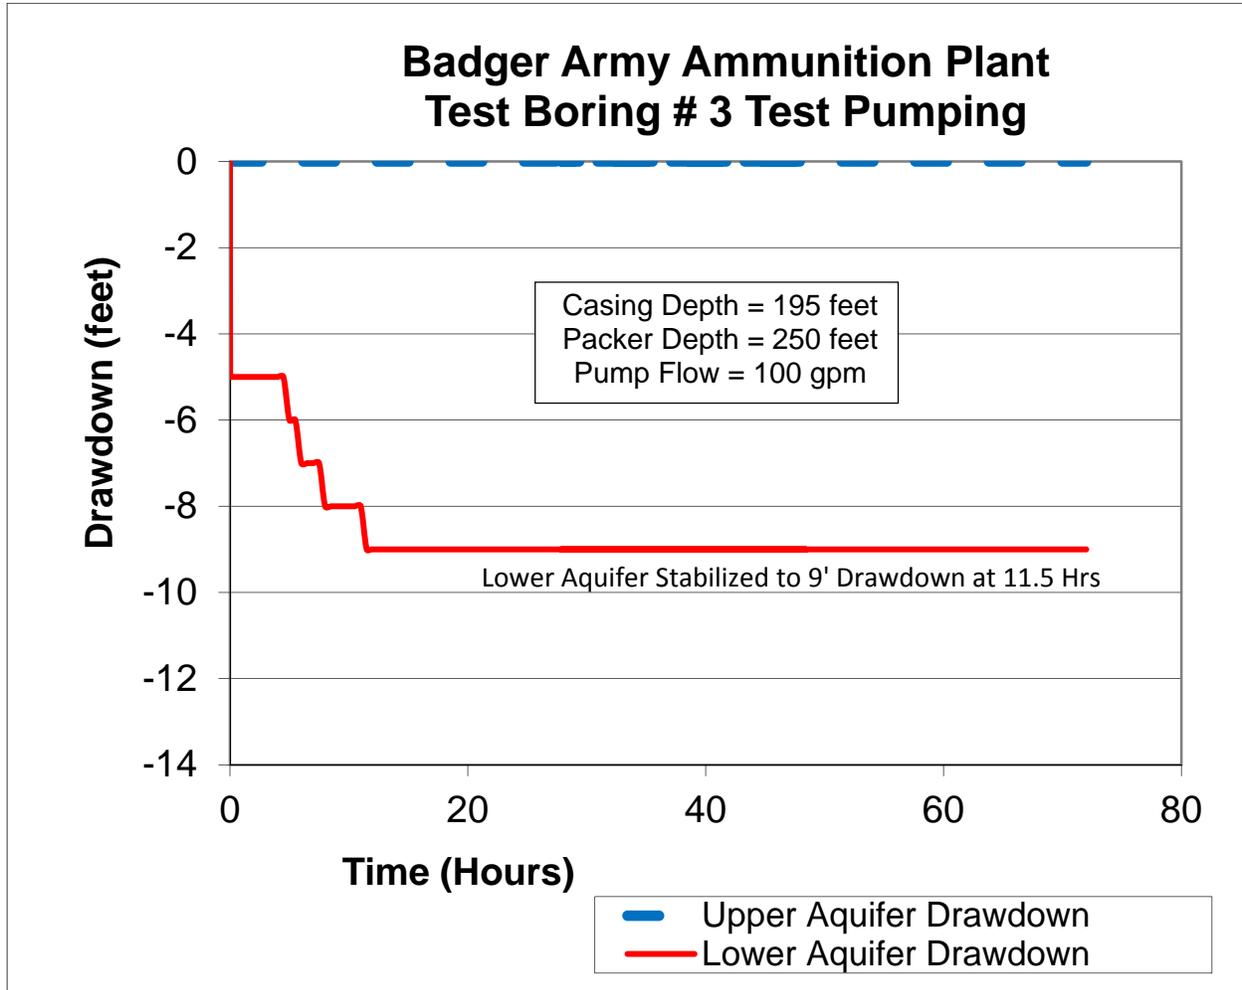

FIGURE 2

Figure 3 – Test Boring # 3 Drawdown vs. Time

III. LOCATIONS

Proposed test well sites are shown on **Figures 4, 5 and 6**. Test wells will be constructed on private property with a temporary easement in place. The Owner will enter in an “agreement to purchase” on the proposed parcels from the current landowners if water quality and quantity results are satisfactory after test pumping of each test well. Each parcel will measure a minimum of 100 feet by 100 feet.

A. Test Well Site A

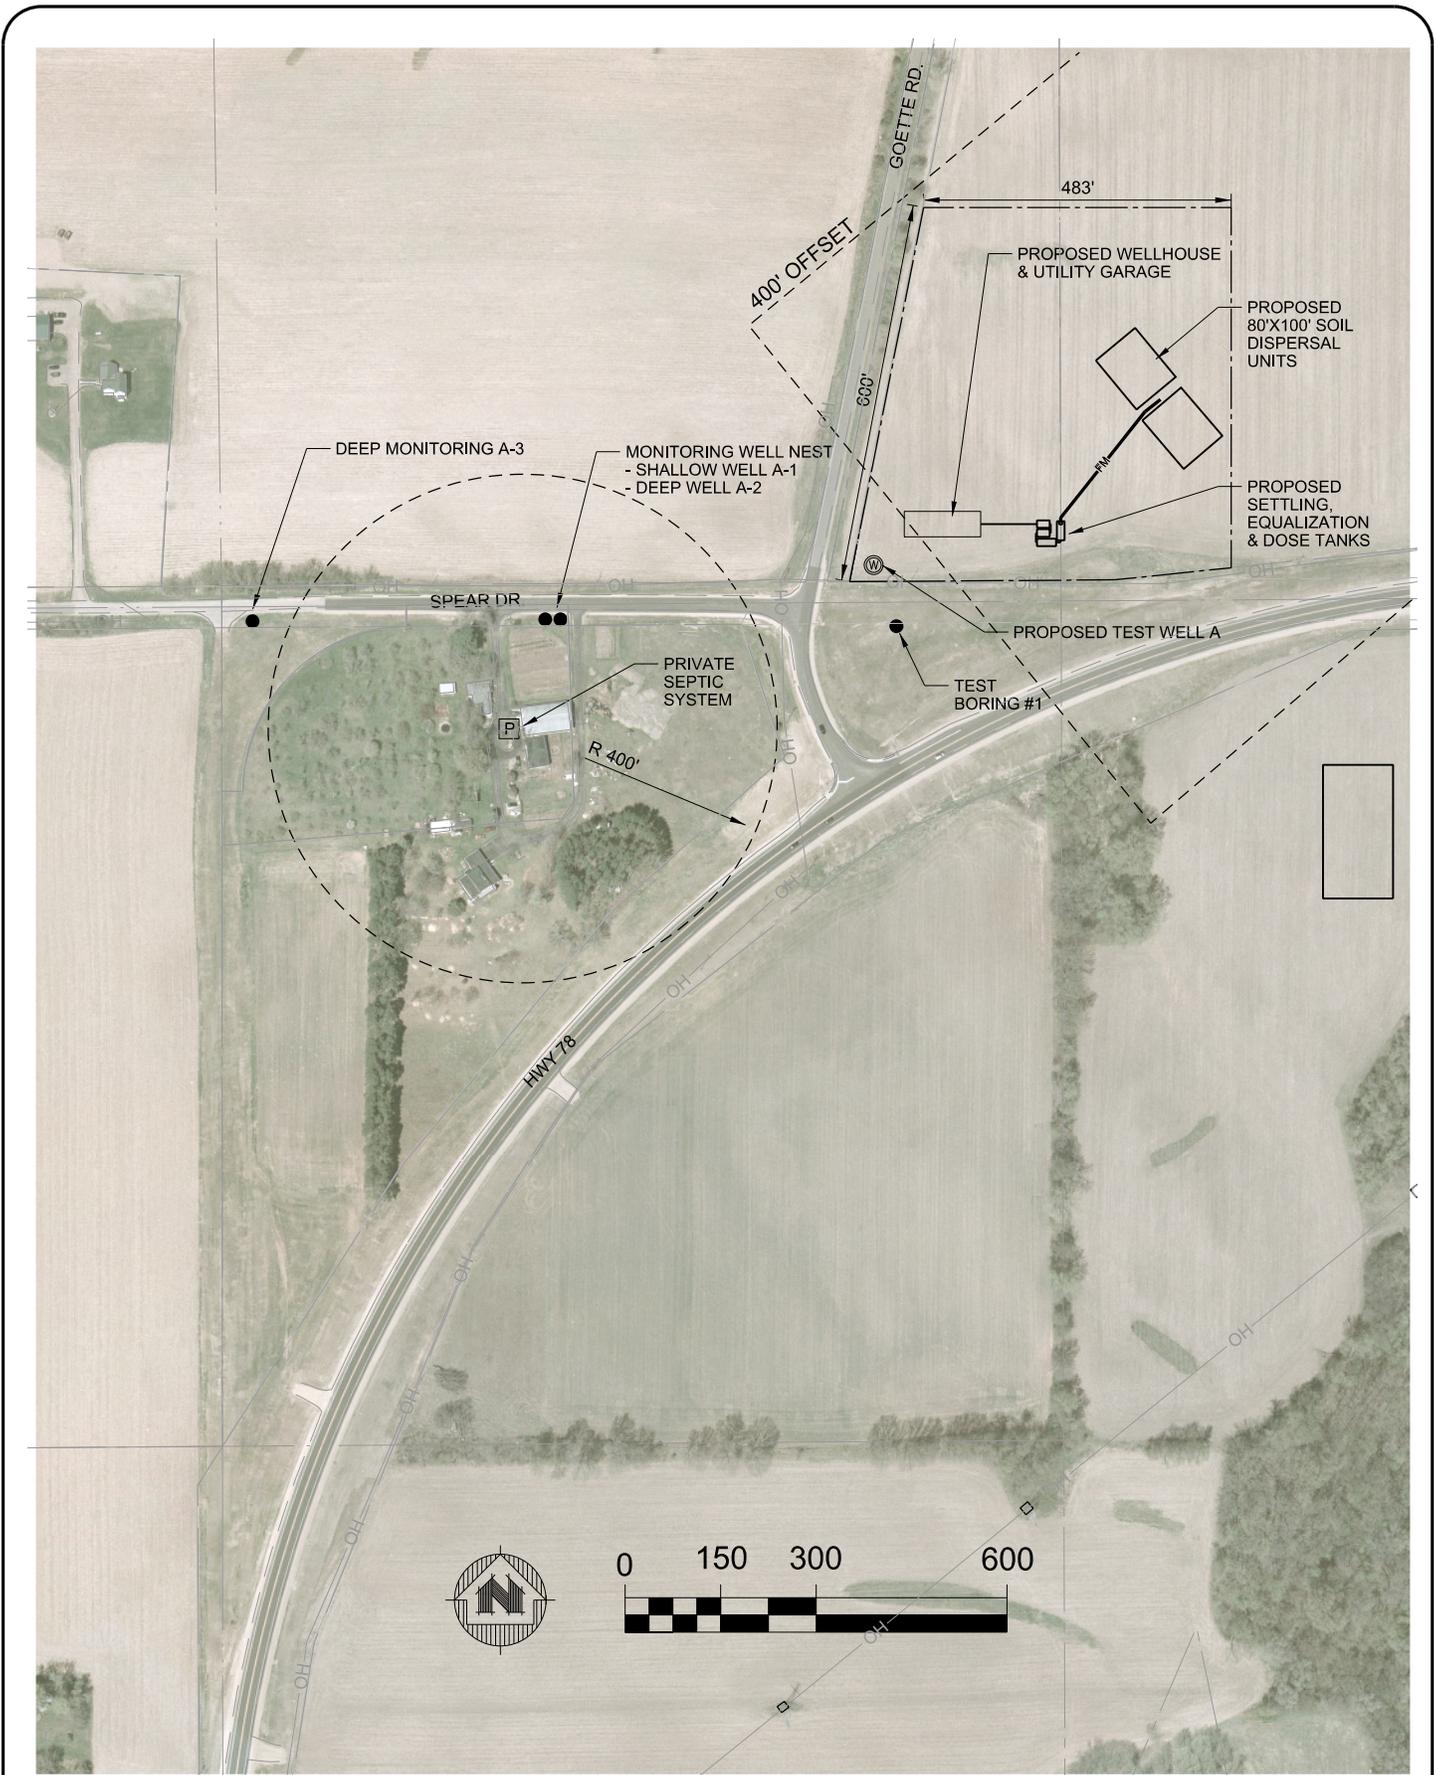

Test Well Site A is located near Test Boring #1 in existing agricultural land at the intersection of Goette Road and Highway 78 located near the north east quadrant of the proposed service area identified in the Water System Feasibility Study (MSA, 2010). The proposed parcel to be acquired is shown in **Figure 4**.

B. Test Well Site B

Test Well Site B is located in the vicinity of Test Boring #3 on Lucille Lane in a future addition to the Foster’s Shore development, located near the north east quadrant of the proposed service area identified in the Water System Feasibility Study (MSA, 2010). A preliminary plat of the proposed development showing the test well location and parcel to be acquired is shown in **Figure 5**.

C. Test Well Site C

Test Well Site C is located near Test Boring #4 approximately 200 feet southeast of the intersection of Highway 78 and Mattson Road. This site is the furthest east of all the sites. A preliminary plat of the proposed development showing the test well location and parcel to be acquired is shown in **Figure 6**.

IV. WELL SITE INVESTIGATION

A. Regional Flood Elevation

According to the Federal Emergency Management Agency Flood Insurance Rate map for Sauk County, the proposed test well sites are located outside of the 100-year Wisconsin River flood plain.

B. Land Use

Figure 1 shows the location of the proposed well sites on a USGS quadrangle map. The area surrounding the proposed sites is as follows:

1. Test Well Site A is located on existing agricultural fields.
2. Test Well Site B is located on existing woodlands that are planned for low-density residential development.
3. Test Well Site C is located on existing agricultural fields.

C. Potential Contamination Sources

Potential contamination sources include groundwater contamination plumes originating from the Badger Army Ammunition Plant. The three BAAAP contaminant plumes are documented in the Water System Feasibility Study (MSA, 2010). The estimated areas of groundwater contamination are shown in **Appendix E, Potential Sources of Contamination**. Proposed well sites are located outside of, and up gradient of areas of groundwater contamination as determined by the Badger Army Ammunition Plant's groundwater monitoring program.

In addition to the documented groundwater contamination plumes, several Federal and State databases were searched for potential contamination sources within one mile of each proposed well site, referred to as the "search area". It should be noted that many of the potential sources of contamination are not located within the search area, but were identified due to their Merrimac address. The complete search results are provided in **Appendix C**. The databases searched include the following:

- The National Priority List (NPL) published by the EPA Office of Emergency and Remedial Response (Including NPL Delisted);
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS);
- No Further Redial Action Plan (NFRAP) sites. Designated comprehensive environmental response compensation and liability information system archived sites (CERCLA);

- Resource Conservation and Recovery (RCRA) site, including corrective action, treatment storage and disposal facilities, generators, sites no longer reporting;
- EPA and State Brownfield Management Systems;
- EPA Emergency Response Notification System;
- State and Federal Tribal Lands;
- Wisconsin Department of Natural Resources Databases, including hazard ranking sites, spill sites, licensed solid waste landfills sites, leaking underground storage tank sites, voluntary party liability exemption sites, and emergency repair program (ERP) sites;
- National Pollution Discharge Elimination System (NPDES);
- EPA Toxic Release Inventory System (TRIS);
- National Radon Database;
- United States Department of Justice National Clandestine Laboratory Register

The database searches of land surrounding Test Boring # 1 (Test Well Site A) included the following potential sources of contamination, all of which are greater than ½ mile from the Test Boring site:

- 1 Tribal Land
- 4 Spill Sites
- 9 Solid Waste Landfills
- 3 Leaking Underground Storage Tank (LUST) sites
- 33 fuel storage tanks (above and below ground)

The database searches of land surrounding Test Boring # 3 (Test Well Site B) returned the following potential sources of contamination, all of which are greater than ½ mile from the Test Boring site:

- 1 Tribal Land
- 6 Spill Sites
- 10 Solid Waste Landfills
- 3 Leaking Underground Storage Tank (LUST) sites
- 35 fuel storage tanks (above and below ground)
- 1 “Release”

The database searches of land surrounding Test Boring # 4 (Test Well Site C) returned the following potential sources of contamination, all of which are greater than ½ mile from the Test Boring site:

- 8 Spill Sites
- 10 Solid Waste Landfills
- 2 Leaking Underground Storage Tank (LUST) sites
- 29 fuel storage tanks (above and below ground)

Tribal Land is not considered a potential source of contamination.

All spills identified have received “closed” status from the Wisconsin DNR or the Wisconsin Department of Agriculture, Trade, and Consumer Protection and are not expected to be potential sources of contamination. The spills confirmed to occur in the search area occurred near Bay Road, which is more than one mile down gradient of the Test Well A location, and further down gradient of Test Well B & C.

There are no solid waste facilities located within a half mile of any well site. The solid waste facilities (landfills) located in by data database searches are shown below in **Table 4-1**.

Table 4-1 – Solid Waste Facilities

Facilty	Status	Address
Sauk County Demo Site SW 003148	Unknown	Merrimac, WI
Village of Merrimac SW 003152	Unknown	Merrimac, WI
Township of Merrimac SW003151	Closed	E13794 Dan-Mar Ct, Merrimac, WI
South Lake WI, Boat Club SW003149	Unknown	Unknown
Merrimac Village Wood Burning Site	Operating	E13536 Hwy 78
Ideal Body Shop SW003147	Unknown	Merrimac, WI
BAAAP Landfill 3146	Closed	BAAAP – west end of Spear Road
BAAAP Landfill 3145	Closed	BAAAP
BAAAP Landfill 3118	Closed	BAAAP
Township of Merrimac SW003150	Unknown	Merrimac, WI

The database search identified three leaking underground storage tank (LUST) sites. The three LUST sites are all located in the Village of Merrimac, which is

approximately 1 ½ miles away from the closest test well site. No LUST sites are located within 1,200 feet of either proposed well site or are potential sources of contamination.

The database searches identified 35 underground or above ground (UST/AST) fuel storage tanks. Of the 35 tanks, 17 have been “closed” or “removed.” **Table 4-2** lists all USTs and ASTs. Tanks with known locations are shown on **Appendix E**, Potential Sources of Contamination.

The area immediately surrounding proposed Test Well Site A does not include any septic systems within the required separation distances from a septic tank (400 feet).

A search of the area near the proposed test well sites was also done utilizing the WDNR GIS Registry of Closed Remediation Sites, and the RR Sites Map. Based on these searches, no potential sources of contamination were identified within ½ mile of the proposed test well sites. (See map in **Appendix C**).

There are currently no septic tanks within a 400-foot separation radius of proposed Test Well Site B. However, preliminary plats of parcels surrounding Test Well Site B indicate future private septic systems are planned to serve single-family homes in the proposed Eagle Point expansion within a 400 foot radius of Test Well B.

Based on the additional investigation performed on Test Boring # 3, the upper unconsolidated sand and gravel aquifer is not hydraulically connected to the lower sandstone aquifer. Further, an upward hydraulic gradient exists in the Mt. Simon aquifer. Based on the hydrogeologic investigation the potential risk of contamination to the confined sandstone aquifer is very low. *The proposed sanitary district is requesting a variance to allow septic tanks within 100 feet of Test Well B if development of a final well in this location occurs.*

D. Proposed Well Capacities

Each final well will be designed to provide 500 gallons per minute to serve fire hydrants within the water system per Wisconsin Administrative Code NR 811. This appears reasonable given the calculated specific capacity of the test borings.

E. Aquifer

Cuttings from all four Test Borings were collected every five feet and submitted to the Wisconsin Geologic and Natural History Survey for geologic identification below the unconsolidated sand and gravel aquifer. The Eau Claire shale/dolomite aquatard was not identified as expected based on the north-south cross section through the Prairie du Sac area presented in the 2005 Wisconsin Geologic and Natural History Survey Bulletin 102, entitled “Hydrogeology and Simulation of Groundwater Flow in Sauk County, Wisconsin.”

Although the Eau Claire formation was not identified, the upper forty feet (approximately) of the identified Mount Simon formation contained alternating layers of dolomite cemented sandstone and shale that is acting as an aquitard and confining the lower Mt. Simon formation as discussed above. Proposed wells in

this region will be cased below the dolomite and shale confining layer, and open to the predominantly sandstone, lower Mt. Simon aquifer.

F. Topography

Figure 1 shows the topography for the proposed well sites in 10-foot contour intervals on a USGS quadrangle map. The proposed well sites and surrounding areas drain southeast towards the Wisconsin River.

G. Direction of Groundwater Flow

Groundwater present in the sand and gravel aquifer in this region flows generally from the northwest to southeast towards the Wisconsin River. However, the proposed test wells and final wells will not be drawing from the sand and gravel aquifer. WGNHS provided some limited data on the groundwater gradient below the aquitard, and is included in the below paragraph, "I. Recharge Area".

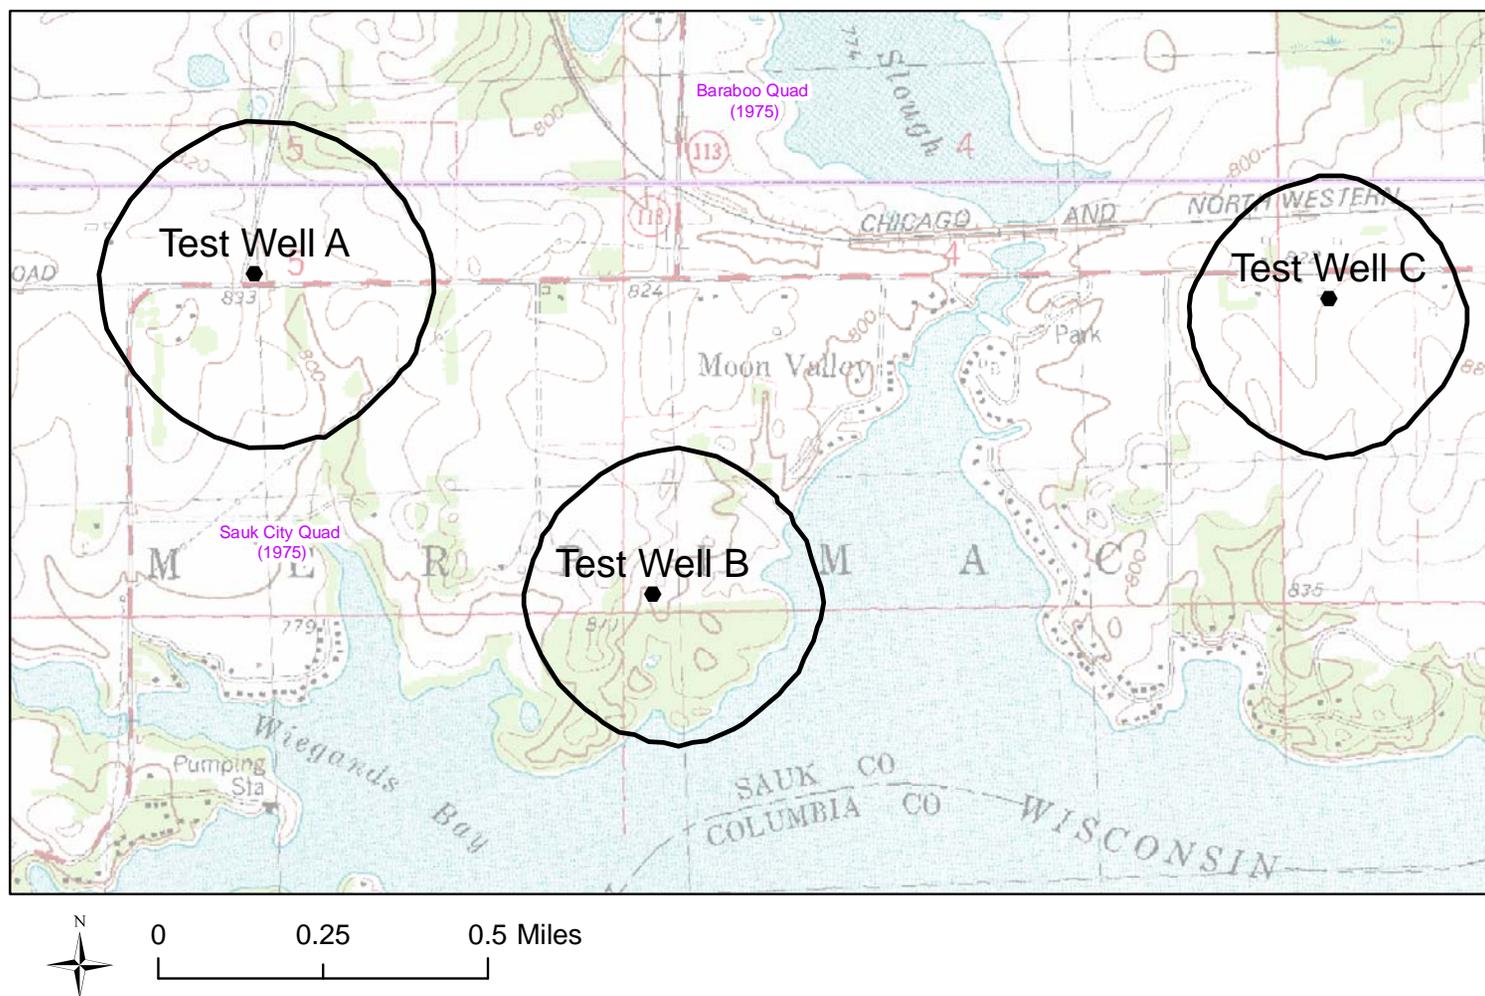

H. Zone of Influence

Based on Wisconsin Geologic & Natural History Survey (WGNHS) modeling, and Test Boring packer testing it is expected that the Mt. Simon sandstone aquifer is not hydraulically connected to the unconsolidated sand and gravel aquifer above and therefore, the zone of influence will be contained within the sandstone aquifer.

In order to further verify this assumption, monitoring well nests will be constructed prior to test pumping. Each well nest will consist of one monitoring well screened into the sand and gravel aquifer and a second monitoring well extended into the sandstone aquifer and cased through the sand and gravel aquifer. These nests will be located approximately 500 feet from each of the proposed test well. An additional sandstone aquifer monitoring well will be constructed approximately 1000 feet from Test Well A, as this site is closest to the documented contamination plumes.

Figure 7 shows the modeled 5-year Zone of Influence for each of the proposed well locations under a simulated pumping rate of 500 gallons per minute. Actual pump test data coupled with monitoring well measurements will be utilized to verify this model.

Simulated 5-year zone of contribution for Test Wells A, B and C, pumping at 500 gpm from Mt. Simon aquifer.

Model documentation provided in Gotkowitz and others, 2002. *Delineation of Zones of Contribution for Municipal Wells in Sauk County, Wisconsin*, Wisconsin Geological and Natural History Survey Open File Report 2002-05

Prepared by M. Gotkowitz, September 5, 2012

I. Recharge Area

Given the presence of the aquitard above the Mt. Simon sandstone the recharge area will be entirely within the Mt. Simon sandstone. According to Madeline Gotkowitz of WGNHS, “the recharge areas are not the area identified on the land surface on the map [Figure 7], but rather the three dimensional area within the Mt Simon aquifer”. The recharge area is the three-dimensional shape defined by the Zone of Influence area times the height of the Mt. Simon sandstone at each proposed well location.

J. Proposed Test Well Construction

Test Wells are proposed to determine aquifer yield and water quality, and to provide data for final well designs. Preliminary construction details for the test wells and corresponding monitoring wells are shown in **Appendix D**.

V. SUMMARY AND RECOMMENDATIONS

The Owner identified that construction of a public water system is the best long term solution to provide clean drinking water to area users. This report identifies three proposed test well sites outside the documented BAAAP groundwater contamination plumes and seeks approval for all three sites. The Owner recommends construction and test pumping of two test wells at Test Well Sites A and C to verify the feasibility of constructing two final wells at these locations as groundwater sources for a proposed public water system. The Owner also asks for the approval of a test well at Test Well Site B in case test well results at either Test Well Site A or C are unsatisfactory.

Proposed test well test pumping will include water quality analysis and water level drawdown measurements at the test wells and corresponding monitoring wells to more accurately estimate a zone of influence. These monitoring wells are expected to confirm that the shale and dolomite present in the upper Mt. Simon formation act as a confining layer above the Mt. Simon aquifer. Water quality analysis will include radiochemistry analysis to determine combined radium 226 and 228 concentrations. If Test Well A and Test Well C indicate adequate water quality and quantity, Final Wells #1 and #2 will be constructed on these corresponding sites.

outwash	0-220						OUTWASH - NOT YET STUDIED.
	220-225		sand	pl bn & mixed	C	Vfn/VC	Many granules. Trace SP, white chert. Igneous & metamorphic rock fragments present. Gravel looks chopped.
	225-230		sand	pl bn & mixed	C	Vfn/VC	Many granules. Trace SP, white chert. Igneous & metamorphic rock fragments present. Gravel looks chopped.
	230-235		gravel	mixed	SP	Gr/SP	
	235-240		gravel	gray & mixed	SP	Gr/MP	
unknown	240-265						Unstudied - shaly. Not sure of what the well driller thought he was in.
Mount Simon Formation	265-270		dolomite	lt gy to gray	Fn	Fn/M	Dense. Much dolomite-cemented M (Vfn/VC) sandstone. Trace sphalerite (scratch plate smell test), floating sand, pyrite, pale pink sand grains.
	270-275		dolomite	lt gy to gray	Fn	Fn	Dense. Much floating sand (mainly Vfn), Fn (Vfn/C) dolomite-cemented sandstone. Trace sphalerite, dark gray shale, pale pink sand.
	275-280		dolomite	lt gy to gray	Fn	Fn/M	Dense. Much floating sand (mainly Vfn), Fn (Vfn/C) dolomite-cemented sandstone. Trace pyritic fossils, pyrite, pale pink sand grains, dark gray shale.

Title: Geologic Log

Depths	Graphic	RockType	Color	Mode	Range	Miscellaneous Characteristics
280-285		dolomite	lt gy to gray	Fn	Fn/M	Dense. Much floating sand (mainly Vfn/Fn). Little/much Fn/M (Vfn/VC) dolomite-cemented sandstone. Trace pyrite.
285-290		dolomite	bn gy & dk bn gy	Fn	Fn/M	Dense. Little Vfn/Fn floating sand. Grades into little Fn (Vfn/VC dolomite-cemented sandstone. Trace fossil fragments, pale pink sand grains.
290-295		dolomite	gy & dk gy	Fn	Fn/M	Dense. Much Vfn/Fn floating sand. Grades into much Fn (Vfn/C) dolomite-cemented sandstone. Little/much very light gray fine-grained limestone. Trace pyrite cement, pale pink sand grains.
295-300		dolomite	gy & dk gy	Fn	Fn/M	Dense. Much Vfn/Fn (Vfn/C) dolomite-cemented sandstone, very light gray to gray fine-grained limestone. Little Vfn floating sand. Trace dark gray shale, pyrite cement.
300-305		dolomite	v lt gy,gy,dk gy	Fn	Fn/M	Dense. Much fine-grained very light gray limestone, Fn (Vfn/M) dolomite-cemented sandstone. Few dolomite crystals. Trace fossil fragments, Vfn/Fn floating sand, pale pink sand. One quartz granule.
305-310		dolomite	gray to lt gy	Fn	Fn/M	Dense. Much Vfn/Fn floating sand, fine-grained very light gray limestone. Little Vfn/Fn dolomite-cemented sandstone. Trace earthy pyrite, pyrite, dark gray shale.
310-315		dolomite	gray to lt gy	Fn	Fn/M	Dense. Much very light gray to light gray fine-grained limestone. Little/much Vfn/Fn (Vfn/C) dolomite-cemented sandstone. Trace pyrite cement, fossil fragments, dark gray shale, quartz granules, pale pink sand & granules.
315-320		dolomite & sandstone	gray to lt gy	Fn & Fn	Fn/M & Vfn/VC	Dense dolomite. Much dolomite cement (sandstone). Trace/little massive pyrite, fine-grained limestone. Trace pyrite, fine pyrite spheres in sandstone, dark gray shale with finely divided pyrite.
320-325		dolomite & sandstone	gray	Fn & Fn	Fn/M & Vfn/VC	Dense dolomite. Much dolomite cement. Little pale brown fine-grained dolic limestone, gray shale with some finely disseminated pyrite. Trace pale pink sand grains, quartz granules.
325-330		dolomite	gray	Fn	Fn/M	Dense. Much Fn (Vfn/VC) dolomite-cemented sandstone. Little pale brown fine-grained dolic limestone. Trace pale pink sand, quartz granules. No pyrite.
330-335		limestone	gray & dark gray	Fn	Fn	Dense. Much dark gray shale. Little fine-grained dolomite-cemented sandstone.
335-340		shale	dark gray	--	--	--
340-345		dolomite	gray	Fn	Fn	Dense. Limy. Much Fn (Vfn/VC) sandstone. Little dark gray shale. Trace pyrite cement (sandstone), pyrite (dolomite), quartz granules, pale pink sand, pale pink quartz granules.
345-350		sandstone	light gray	Fn	Vfn/VC	Little limy fine-grained dolomite. Trace/little pyrite cement, pyrite spheres up to 0.35mm, dark gray caved? shale. 1% pale pink sand grains. Sandstone cement is not discernible/poor - not sure what it is (was).
350-355		sandstone	light gray	Fn/M	Vfn/VC	Little pyrite as cement & golden spheres up to 0.40mm. Little caved dolomite. Trace quartz granules, pale pink quartz granules, dark gray caved shale. 10% pale pink sand grains. Cement not discernible.
355-360		sandstone	light gray	Vfn/Fn	Vfn/VC	Radically cleaner. Trace pyrite cement, quartz granules, caved shale & dolomite. 10% pale pink sand grains.
360-365		sandstone	light gray	Fn	Vfn/VC	Little dolomite-cemented Vfn/Fn sandstone (caved?). Trace pyrite cement, very very light gray siliceous shale with finely divided pyrite, caved shale & dolomite. 3% pale pink sand grains. As seen in other Mount Simon sections the percentage of pale pink sand grains goes up as the grain size increases.
365-370		sandstone	light gray	Fn/M	Vfn/VC	Little pyrite cement, gray caved? fine-grained dolomite. Trace pale pink quartz granules, (colorless) quartz granules, dark gray shale. 20% pale pink sand grains.
370-375		sandstone	light gray	Fn/M	Vfn/VC	Little pyrite cement. Trace pyrite spheres up to 0.5mm, quartz granules, caved? gray dolomite, gray green shale. 20% pale pink quartz sand grains.
375-380		sandstone	light gray	Fn/M	Vfn/VC	Little gray green shale. Trace pyrite cement, pink quartz granules, caved dolomite. 50% pale pink sand grains.
380-385		sandstone	light gray	M/C	Vfn/VC	Trace/little pyrite cement, gray green shale, dark gray to gray black shale. Trace quartz granules, 60% pale pink sand grains.
385-390		sandstone	light gray	Fn	Vfn/VC	Cleaner. Trace pyrite cement, pyrite spheres, quartz granules, dark gray to gray black shale, gray green shale. 20% pale pink sand grains.
390-395		sandstone	light gray	Vfn/Fn	Vfn/VC	Trace pyrite cement, pyrite spheres, quartz granules, dark gray to gray black shale, gray green shale. 20% pale pink sand grains.
395-400		sandstone	light gray	Fn & C	Vfn/VC	Trace/little pyrite cement. Trace pale pink quartz granules, pink quartzite granules, colorless quartz granules, gray green shale, dark gray to gray black shale. 35% pale pink sand grains.
400-405		sandstone	light gray	Fn	Vfn/VC	Trace to little pale green shale with much floating silt & finely disseminated pyrite. Trace pyrite cement, quartzite granules, colorless quartz granules, gray to dark gray caved? shale, caved fine-grained dolomite. 2% pale pink sand grains.
405-410		sandstone	light gray	Fn	Vfn/VC	Trace pyrite cement, gray green shale, caved dolomite, caved? dark gray shale. 2% pale pink sand grains.
410-415		sandstone	light gray	Fn	Vfn/VC	Trace pyrite cement, colorless quartz granules, gray shale, pale pink quartz granules, caved dolomite, caved? dark gray shale. 3% pale pink sand grains.
415-420		sandstone	light gray	Fn/M	Vfn/VC	Trace pyrite cement, colorless quartz granules, gray shale. 40% pale pink sand grains.

Mount
Simon
Formation

Title: Geologic Log

	Depths	Graphic	RockType	Color	Mode	Range	Miscellaneous Characteristics
Mount Simon Formation	420-425		sandstone	light gray	Fn	Vfn/VC	Little gray to dark gray shale with a trace of finely disseminated pyrite & drusy pyrite. Trace pyrite cement, colorless quartz granules, pink quartzite granules, fine-grained dolomite. 35% pale pink sand grains.
	425-430		sandstone	light gray	Fn	Vfn/VC	Little gray to dark gray shale. Trace pyrite cement, pale pink quartz granules, pink quartzite granules, pink quartzite SP, fine-grained caved? dolomite, colorless quartz granules. 25% pale pink sand grains.
	430-435		sandstone	light gray	M	Vfn/VC	Cleaner. Trace pyrite cement, pale pink quartz granules, colorless quartz granules, gray green shale, silica cement, gray shale, ground white silica. 50% pale pink sand grains.
	435-440		sandstone	light pink gray	Fn/M	Vfn/VC	Trace pyrite cement, pale pink quartz granules, pink quartz SP, colorless quartz granules, gray green shale, silica cement, gray shale. 30% pale pink sand grains.
	440-445		sandstone	gray pink	M	Vfn/VC	Trace pyrite cement, silica cement (mainly finer sand), colorless quartz granules, pale pink quartz granules, pink quartzite granules, yellow quartz granules, caved? gray shale, ground white silica.
	445-450		sandstone	gray pink & purple	VC	Vfn/VC	Many granules (colorless quartz, pale pink quartz, pink to purple quartzite, gray quartzite). Trace quartzite SP, quartzite MP, caved gray shale, ground white silica. One piece of quartzite had a pyrite-rich cleavage face. No apparent cement.
	450-455		sandstone	gray pink & purple	VC	Vfn/VC	Many granules (colorless quartz, pale pink quartz, pink quartzite). Trace dark gray quartzite SP, pink quartzite SP, pink quartzite MP, colorless quartzite SP, ground white silica. No apparent cement.
	455-460		sandstone	gray pink	Fn/M	Vfn/VC	Radically cleaner. Trace pale pink quartz granules, pink quartzite granules, caved? gray green shale. Minor trace ground white silica.
Precambrian	460-465		gravel	red purple	SP	Gr/MP	Primarily quartzite. Very angular. Much quartz sand. Little yellow quartz as large sand and gravel. Few colorless quartz granules. Trace ground white silica. This could be seen as Precambrian bedrock but there is quite a mixture of Precambrian quartz and quartzite in this sample.

Horicon Member	0-230		unstudied				Glacial outwash - to be studied shortly.
	230-235		sand	pale bn & mixed	C	Fn/VC	Little gravel up to LP.
Mount Simon Formation	235-240						
	240-245		sandstone	gray	Fn	Vfn/C	Much dolomite cement, golden pyrite cement, gray shale.
	245-250		sandstone	gray	Fn/M	Vfn/VC	Much dolomite cement. Little pyrite cement, gray shale, dolomite. Trace fossil shells.
	250-255		sandstone	gray	Fn/M	Vfn/C	Much dolomite cement, dolomite, dark gray shale. Few fossil fragments. Trace pyrite cement, concentrated floating sand in dolomite
	255-260		dolomite	gray	Fn	Fn	Much very fine (Vfn/VC) dolomite-cemented sandstone, dark gray shale. Few fossils in sandstone. Trace pyrite cement.
	260-265		sandstone	gray to dark gray	Fn	Vfn/C	Much dolomite cement. Little gray dolomite, dolomite-cemented siltstone. Trace pyrite cement, fossil fragments.
	265-270		dolomite	gray	Fn	Fn	Much fine (Vfn/C) dolomite-cemented sandstone with trace fossils and pyrite (mostly as gray black bands and spots). Little caved? shale.
	270-275		sandstone	gray to lt gray	Fn	Vfn/C	Much dolomite cement, dark gray shale fine-grained dolomite. Trace pyrite cement, fossil fragments. One VC angular very pale pink quartz grain (1.5mm).
	275-280		sandstone	lt gray to gray	Vfn	Vfn/C	Much dolomite cement, dolomite with floating sand. Trace pyrite cement, fossils. No shale.

Title: Geologic Log

Depths	Graphic	RockType	Color	Mode	Range	Miscellaneous Characteristics
280-285		dolomite & sandstone	gray brown & pink	Fn & Fn	Fn & Vfn/C	Much floating sand up to C. Sandstone is fine-grained (Vfn/M) & dolomite-cemented. Trace M-grained (Vfn/C) dolomite-cemented sandstone. VC sand grains are rare and may be all caved. Most fine sandstone is pale pink. Most dolomite is gray brown.
285-290		dolomite	gray brown & pink	Fn	Fn/M	Much floating sand up to M, dolomite-cemented fine (Vfn/VC) sandstone. Little very fine gray brown dolomite. Trace pyrite cemented sandstone.
290-295		dolomite	lt gray to gray	Fn	Fn/M	Much dolomite-cemented sandstone. Little floating sand. Trace pyrite cement (sandstone), gray shale, earthy pyrite, very light gray fine-grained limestone.
295-300		dolomite	lt gray to gray	Fn	Fn/M	Much dolomite-cemented sandstone. Little floating sand, light gray fine-grained limestone, dark gray shale. Trace glossy pyrite ovoids (in sandstone), earthy pyrite.
300-400		NO SAMPLE				
400-405		sandstone	lt gray to gray	M	Vfn/VC	Much silica cement, gray green to gray to dark gray shale. Little pyrite mostly as cement but also associated with shale. Trace red purple quartzite granules, quartz granules. ~50% pale pink sand grains ranging up to VC & granules in size. Pale pink percentages are lower among finer sand grains. Association: gray shale wrapped on quartzite granule.
405-410		sandstone	lt gray to dk gray	M	Vfn/VC	Much light gray to dark gray shale. Little to much pyrite. Little silica cement, fine-grained gray/dark gray dolomite. ~50% pale pink sand grains ranging up to VC in size. Sandstone occurs adjacent to shale.
410-415		sandstone & shale	lt gray to dk gray	M/C	Vfn/VC	Little to much pyrite. Little silica cement. Few pale brown to black fossil shell fragments. Some finely divided pyrite in shale. Trace pale pink quartzite sand & granules, quartz granules, gray to dark gray fine-grained dolomite, ground white silica. ~50% pale pink sand grains ranging up to VC & granules in size. Sandstone occurs adjacent to shale.
415-420		sandstone	lt gray to dk gray	Fn/M	Vfn/VC	Much light gray to dark gray shale. Little silica cement, pyrite. Few pale brown to black fossil fragments. Trace pink quartzite sand, quartz granules, dark gray fine-grained dolomite. 25% pale pink sand grains ranging up to VC & granules in size.

Mount
Simon
Formation

Title: Geologic Log

	Depths	Graphic	RockType	Color	Mode	Range	Miscellaneous Characteristics
Mount Simon Formation	420-425		sandstone	gray to lt gray	M	Vfn/VC	Much pyrite, light gray to gray shale. Little silica cement, very light gray silica-cemented siltstone. Few light gray to dark gray fossil shell fragments. Trace quartz granules, dark gray shale, gray green shale, ground white silica. ~40% pale pink sand grains ranging up to VC in size.
	425-430		shale	gray to lt gray	--	--	Shale is siliceous. Little to much pyrite, very light gray siltstone, silica-cemented Vfn-grained (Vfn/VC) sandstone. Trace quartz granules, pale pink quartzite granules, fossil shell fragments.
	430-435		sandstone	lt gray to dk gray	C	Vfn/VC	Much pyrite, very light gray to dark gray shale. Little silica shale, siliceous white interstitial shale acting as cement in sandstone. Trace quartz granules, pink quartzite granules. 70% pale pink sand grains ranging up to VC & granules in size. Sandstone is clearly adjacent to shale layers.
	435-440		sandstone	lt gray to dk gray	M/C	Vfn/VC	Much light gray to dark gray shale. Little to much pyrite. Little silica cement (mostly in fine sandstone), white siliceous interstitial shale acting as cement. Few dark gray fossil shell fragments. Trace quartz granules/SP, gray green shale. 10% pale pink sand grains ranging up to VC & granules in size.
	440-445		sandstone	lt gray to gray	M	Vfn/VC	Much light gray to gray shale. Little to much pyrite. Little silica cement (mostly in Vfn sandstone). Trace pink quartzite granules/MP, quartz granules, pyrite veiling, siltstone. 10% pale pink sand grains ranging up to VC in size.
	445-450		shale	light brown gray	--	--	Little pyrite usually as pyrite cement, C (Fn/VC) sandstone. Trace gray green shale, quartz granules, pale pink quartzite granules. 1% pale pink sand grains.
Caledonia Church Rhyolite	450-455		rhyolite	dark gray	Fn	Fn/M	Fresh. Trace white quartz veins, dark gray feldspar phenocrysts. Minor trace pyrite.

Geologic log, *samples partly studied, *test hole for municipal well, *subsurface boring (non-core) site, Drill cuttings available

Formations:

outwash, Mount Simon Formation

Log Comments:

Note greater percentage of pale pink sand grains associated with coarser lithology mode in the sandstones. This holds true until the bottom part of the well is reached. The pale pink sand grains were deposited from the weathering Baraboo Range immediately to the northwest. Trace to little pyrite is usually present throughout the bedrock section of the well. 0-185' glacial outwash still needs studying.

	185-190		gravel & sand	mixed & pl brown	MP & C	Gr/LP & Vfn/VC	Igneous & metamorphic rock fragments. No Mount Simon rock fragments.
Mount Simon formation	190-195		sandstone	gray	Fn	Vfn/VC	Much dolomite cement. Little gray shale, caved glacial sand & gravel.
	195-200		NO SAMPLE				
	200-205		shale	gray	--	--	Much Fn/M dolomite cemented sandstone. Little Vfn dolomite cemented sandstone. Trace pyrite, fossil fragments (in sandstone).
	205-210		sandstone	lt gy & gray	Fn/M	Vfn/VC	Much gray shale. Little dolomite cement. Trace pyrite cement. VC sand grains are rare.
	210-215		shale	gray	--	--	Much dolomite cemented Fn/M (Vfn/C) sandstone.
	215-220		sandstone	lt gy & gray	Fn/M	Vfn/C	Little/much dark gray shale shale, dolomite cement. Trace/little pyrite cement.
	220-225		shale	gray & lt gray	--	--	Much Fn/M (Vfn/C) sandstone with little dolomite cement & trace fossils. Trace fossil fragments (shale), pyrite cement (sandstone).
	225-230		sandstone	lt gy & gray	Fn	Vfn/C	Little dolomite cement, gray fossiliferous shale. Trace pyrite cement.
	230-235		sandstone	lt gy & gray	Fn	Vfn/C	Little dolomite cement, gray fossiliferous shale. Trace pyrite cement.
	235-240		shale	gray & lt gray	--	--	Much Fn/M (Vfn/C) sandstone with little dolomite cement. Little floating sand. Trace pyrite cement (sandstone), fossils (shale).
	240-245		sandstone	light gray	Fn/M	Vfn/VC	20% pale pink quartz sand grains up to VC. Much light gray fine-grained dolomite. Trace dolomite cement, pyrite cement, green gray shale.
	245-250		sandstone	lt gray & gray	Fn/M	Vfn/VC	20% pale pink quartz sand grains up to VC. Little dolomite cement, pyrite cement, light gray fine-grained dolomite. Trace green gray shale, fossils.
	250-255		sandstone	light gray	M	Vfn/VC	25% pale pink quartz sand grains up to VC. Trace pyrite cement, fossils, light fine-grained dolomite. No dolomite cement.
	255-260		sandstone	lt gy & gray	Fn/M	Vfn/VC	15% pale pink quartz sand grains up to VC. Much light gray fine-grained dolomite. Trace to little dolomite cement. Trace fossils, gray shale.
260-265		sandstone	light gray	Fn/M	Vfn/VC	15% pale pink quartz sand grains up to VC. Trace pyrite cement, fossils, fine-grained dolomite.	
265-270		sandstone	light gray	Fn/M	Vfn/VC	15% pale pink quartz sand grains up to C. Little dolomite cement, light gray fine-grained dolomite, gray shale with trace finely divided pyrite. Trace pyrite cement, fossil fragments.	
270-275		sandstone	light bn gray	Fn/M	Vfn/VC	10% pale pink quartz sand grains up to VC. Little dolomite cement, light gray dolomite (some with floating sand). Trace gray shale, quartz granules.	
275-280		sandstone	light bn gray	M	Vfn/VC	5% pale pink quartz sand grains up to VC. Much dolomite cement. Little dolomite (some with floating sand). Trace green gray shale, quartz granules.	

Title: Geologic Log

	Depths	Graphic	RockType	Color	Mode	Range	Miscellaneous Characteristics
Mount Simon formation	280-285		sandstone	light bn gray	M	Vfn/VC	5% pale pink quartz sand grains up to VC. Little dolomite cement, fine-grained dolomite. Trace pyrite cement, gray to dark brown gray shale.
	285-290		sandstone	light gray	M	Vfn/VC	30% pale pink quartz sand grains up to VC. Much fine-grained dolomite. Little dolomite cement. Trace pyrite cement, gray shale.
	290-295		sandstone	light gray	M	Vfn/VC	7% pale pink quartz sand grains up to VC. Trace pyrite cement, 0.3 to 0.75mm glossy pyrite ovoids (also globular), light gray fine-grained dolomite, gray shale. No dolomite cement.
	295-300		sandstone	light gray	M	Vfn/VC	5% pale pink quartz sand grains up to VC. Trace dolomite cement, pyrite cement, pyrite ovoids, light gray fine-grained dolomite, gray shale, ground white silica.
	300-305		sandstone	light gray	Fn/M	Vfn/VC	5% pale pink quartz sand grains up to VC. Little dolomite cement. Trace pyrite cement, light gray fine-grained dolomite, fossil fragments, gray shale.
	305-310		sandstone	light gray	Fn/M	Vfn/VC	7% pale pink quartz sand grains up to VC & granule. One 4mm pale pink quartz subrounded granule. Little dolomite cement, pyrite as cement / sand grain coating / glossy ovoids / earthy spots. Trace quartz granules, gray shale, caved? dolomite, ground white silica.
	310-315		sandstone	light gray & gray	Fn/M	Vfn/VC	5% pale pink quartz sand grains up to VC. Trace to little pyrite as cement / earthy spots / sand grain coatings. Trace dolomite cement, dark gray shale, caved green gray shale, fine-grained dolomite, quartz granules, ground white silica.
	315-320		sandstone	light gray	Fn/M	Vfn/VC	3% pale pink quartz sand grains up to VC. Trace pyrite as cement/glossy ovoids/sand grain coatings, light gray pyritiferous shale, dark gray shale, light gray fine-grained dolomite.
	320-325		sandstone	light gray	Fn/M	Vfn/VC	15% pale pink quartz sand grains up to VC. Trace pyrite as in 315-320, light gray dolomite (some sandy), shale.
	325-330		sandstone	light gray	Fn/M	Vfn/VC	5% pale pink quartz sand grains up to VC & granule. Trace dolomite cement, pyrite as cement/glossy ovoids/earthy pyrite/sand grain coating, shale, light gray fine-grained dolomite.
	330-335		sandstone	light gray & gray	M	Vfn/VC	20% pale pink quartz sand grains up to VC & granule. Little gray to dark gray shale. Trace dolomite cement, pyrite as cement/glossy ovoids/earthy pyrite/sand grain coating, light gray dolomite, quartz granules, ground white silica.
	335-340		sandstone	light gray & gray	M	Vfn/VC	20% pale pink quartz sand grains up to VC. Little dolomite cement, gray to dark gray shale, light gray/gray/brown gray fine-grained dolomite (some with floating sand). Trace glossy pyrite ovoids, pyrite cement, pyrite veiling on sand grains. Sandstone varies from light gray to white. One 11mm brown gray dolomite ripup in sandstone. One 4.5mm very pale pink quartzite small pebble with notable pyrite.
	340-345		sandstone	light gray	Fn/M	Vfn/VC	5% pale pink quartz sand grains up to VC. Little dolomite cement, silica cement. Trace pyrite cement, pyrite veiling on coarser sand grains, gray shale - some interstitial, ground white silica. One glossy pyrite ovoid.
	345-350		sandstone	light gray	Fn	Vfn/VC	2% pale pink quartz sand grains up to VC. Trace dolomite cement, pyrite cement, pyrite veiling especially in larger sand grain grooves, gray shale, quartz silt, quartz granules.
	350-355		sandstone	light gray	Fn	Vfn/VC	2% pale pink quartz sand grains up to VC. Trace pyrite cement, calcareous cement, pyrite veiling as above, gray shale, ground white silica. VC grains are rare.
	355-360		sandstone	light gray	Fn	Vfn/VC	3% pale pink quartz sand grains up to VC. Trace pyrite cement, silica cement, dolomite cement, quartz granules, pyrite veiling, gray shale, quartz silt, ground white silica.
	360-365		sandstone	light gray	M	Vfn/VC	20% pale pink quartz sand grains up to VC. Trace pyrite cement, silica cement, glossy pyrite ovoids, pyrite veiling, gray shale, quartz silt, ground white silica.
	365-370		sandstone	light gray	Fn	Vfn/VC	5% pale pink quartz sand grains up to C. Trace pyrite cement, dolomite cement, glossy pyrite ovoids, gray shale, quartz silt.
	370-375		sandstone & shale	lt gray/gray/dk gray	M	Vfn/VC	25% pale pink quartz sand grains up to VC & granule. Much silica cement. Little pyrite cement as cement/in shale/in dolomite, fine-grained dolomite. Mica flakes in shale. One shale fragment had many fossil shell fragments. Trace ground white silica.
	375-380		shale	lt gray/gray/dk gray	--	--	25% pale pink quartz sand grains up to VC & granule. Much silica cemented sandstone. Little pyrite cement, fine-grained light gray dolomite with pyrite. Trace quartz granules. Mica flakes in shale. Some shale ripups in sandstone. Many unusual gray to dark gray / sandstone associations. Some appear to be depositional & some ripup related. One 3.5mm well rounded piece of shale(?) coated with golden chalcopyrite - much different looking than the pyrite in the rest of the sample. One 1.75mm subrounded quartz sand grain with a 0.1mm pyrite vein in it.
380-385		sandstone	light gray	Fn	Vfn/VC	5% pale pink quartz sand grains up to VC. Trace pyrite cement, silica cement, glossy pyrite ovoids, gray shale, ground white silica.	
385-390		sandstone	light gray	Fn	Vfn/VC	5% pale pink quartz sand grains up to VC. Trace pyrite cement, silica cement, glossy pyrite ovoids, gray shale, ground white silica.	
390-395		sandstone	light gray	Fn	Vfn/VC	20% pale pink quartz sand grains up to VC. Trace pyrite cement, silica cement, glossy globular pyrite, gray shale, gray green shale.	
395-400		sandstone	light gray	Fn	Vfn/VC	25% pale pink quartz sand grains up to VC. Little pyrite as cement & coatings. Trace silica cement, gray shale, gray green shale, quartz silt, ground white silica.	
400-405		sandstone	light gray	Fn/M	Vfn/VC	30% pale pink quartz sand grains up to VC. Little gray shale with finely divided pyrite. Trace to little pyrite cement. Trace caved? light gray fine-grained dolomite, silica cement.	
405-410		sandstone	light gray	Fn/M	Vfn/VC	15% pale pink quartz sand grains up to C. Trace pyrite cement, green gray shale, fossils.	
410-415		sandstone	lt gray & gray	Fn/M	Vfn/VC	15% pale pink quartz sand grains up to C. Little gray to dark gray shale. Trace pyrite as cement/in shale/coatings, silica cement, fossil shell fragments, quartz silt, ground white silica.	
415-420		sandstone	lt gray & gray	Fn/M	Vfn/VC	10% pale pink quartz sand grains up to VC and granule. Little gray to dark gray shale. Trace pyrite as cement & in shale, silica cement, fossil shell fragments, ground white silica.	

Title: Geologic Log

Depths	Graphic	RockType	Color	Mode	Range	Miscellaneous Characteristics
420-425		sandstone	lt gray & gray	Fn/M	Vfn/VC	20% pale pink quartz sand grains up to VC. Trace pyrite cement, silica cement, gray shale, gray green shale, quartz granules, ground white silica.
425-430		sandstone	light gray	Fn/M	Vfn/VC	10% pale pink quartz sand grains up to VC. Trace silica cement, pyrite cement, pyrite veiling on coarser sand grains gray shala, gray brown shale, fossil shell fragments, quartz silt.
430-435		sandstone	light gray	Fn/M	Vfn/VC	20% pale pink quartz sand grains up to VC and granule. Trace to little pyrite cement. Trace silica cement, gray shale, gray green shale, quartz silt, ground white silica.
435-440		sandstone	lt gray & bn gray	M	Vfn/VC	20% pale pink quartz sand grains up to VC and granule. Much gray brown/gray/light gray/dark gray shale.Trace silica cement, pyrite cement, pyrite coating, fossil shell fragments, quartz silt, ground white silica.
440-445		sandstone	very pale brown	M/C	Fn/VC	1% pale pink quartz sand grains up to VC. Trace quartz granules, pale brown silica-cemented fine sandstone, pale brown silica-cemented siltstone, ground white silica.
445-450		sandstone	v pl bn & gy bn	M/C	Vfn/VC	1% pale pink quartz sand grains up to VC. Little pale brown silica-cemented siltstone to Vfn sandstone with trace fossils/mica flakes/floating sand. Trace pyrite cement, quartz granules, quartz SP, ground white silica.
450-455		sandstone	light gray	M	Vfn/VC	1% pale pink quartz sand grains up to VC. Trace pyrite cement, pale brown silica-cemented siltstone to Vfn sandstone, quartz granules, ground white silica.
455-460		sandstone	very pale brown	M	Vfn/VC	1% pale pink quartz sand grains up to C. Trace pyrite cement, silica cement, pale brown silica-cemented siltstone to Vfn sandstone, quartz granules, quartz silt, ground white silica.
460-465		sandstone	light gray brown	Fn/M	Vfn/VC	1% pale pink quartz sand grains up to VC. Little pale brown silica-cemented siltstone to Vfn sandstone. Trace pyrite cement, quartz SP, quartz granules, ground white silica. One 2.5mm granule of very pale pink quartzite.
465-470		sandstone	pale brown	M	Vfn/VC	Radical change. 2 sandstone types: pale brown siltstone to Vfn sandstone & coarser sand & granules with no visible cementing. 10% pale pink quartz sand grains up to VC (excluding quartzite pieces). Much pale brown silica-cemented siltstone to Vfn sandstone - sometimes with many larger quartz and pale pik quartz sand grains. Few angular granules of very pale pink to dark red purple quartzite. Trace caved pyrite, quartz granules, quartz silt, ground white silica.
470-475		sandstone	pale brown	M	Vfn/VC	20% pale pink quartz sand grains up to VC & granule/SP(excluding quartzite pieces). Much pale brown silica-cemented siltstone to Vfn sandstone with some included colorless quartz & pale pink sand grains. Few angular sand to granule size pieces of very pale pink to dark pink quartzite. Trace caved pyrite, quartz granules, ground white silica.
475-480		sandstone	pale brown	M	Vfn/VC	10% pale pink quartz sand grains up to VC (excluding quartzite pieces). Much pale brown silica-cemented siltstone to Vfn sandstone with some included colorless quartz & pale pink sand grains. Few angular sand to SP size pieces of very pale pink to pink purple quartzite. Trace caved pyrite, quartz granules, ground white silica. One pink quartzite SP has a white quartz sand & silt-looking vein.

Title: Geologic Log

Depths	Graphic	RockType	Color	Mode	Range	Miscellaneous Characteristics
0-5		sand	lt brown	M	Vfn/C	Little silt. Trace gravel up to granules in size.
5-10		gravel	lt brown	Gr	Gr/SP	Little clay, silt. Trace sand grains, chert.
10-15		clay	v lt brown	--	--	Trace silt.
15-20		clay	v lt brown	--	--	Trace silt, Fn grained quartz sand.
20-25		clay	v lt brown	--	--	Trace silt, Fn grained quartz sand, gravel up to LP.
25-30		clay	v lt brown	--	--	Trace silt, Fn grained quartz sand.
30-35		clay	v lt brown	--	--	Trace silt.
35-40		sand	v lt brown	M	Vfn/C	Little clay, silt.
40-45		gravel	mixed	SP	Gr/MP	Little sand, clay. Trace chert.
45-50		gravel	lt brown	Gr	Gr/MP	Much clay coating gravel. Little sand.
50-55		gravel	lt brown	Gr	Gr/MP	Much clay coating gravel, sand.
55-60		gravel	lt brown	SP	Gr/LP	Much clay coating gravel. Little sand. Trace chert.
60-65		gravel	lt brown	MP	Gr/LP	Much clay coating gravel. Trace sand, chert.
65-70		gravel	lt brown	SP	Gr/MP	Much clay coating gravel. Trace sand.
70-75		gravel	mixed	SP	Gr/MP	Little clay, sand.
75-80		sand	brown	M	Vfn/VC	Little clay, silt. Trace gravel up to LP.
80-85		sand	lt brown	Fn	Vfn/VC	Trace gravel up to LP, silt.
85-90		sand	lt brown	M	Vfn/VC	Little gravel up to LP, clay.
90-95		sand	lt brown	M	Vfn/VC	Trace gravel up to Gr, silt.
95-100		sand	lt brown	M	Vfn/VC	Trace gravel up to MP. Trace clay, chert.
100-105		sand	lt brown	M	Vfn/VC	Trace chert, silt.
105-110		sand	lt brown	M	Vfn/VC	Trace chert, silt.
110-115		sand	lt brown	M	Vfn/VC	Trace chert, silt.
115-120		sand	lt brown	C	Vfn/VC	Trace gravel up to Gr, silt.
120-125		sand	v lt brown	M	Vfn/VC	Trace gravel up to Gr, silt.
125-130		sand	v lt brown	M	Vfn/VC	Trace gravel up to Gr, silt, chert.
130-135		sand	v lt brown	M	Vfn/VC	Trace gravel up to Gr, silt, chert.
135-140		sand	lt brown	M	Vfn/VC	Trace gravel up to MP, silt. Little clay.

outwash

Title: Geologic Log

Depths	Graphic	RockType	Color	Mode	Range	Miscellaneous Characteristics
140-145		sand	lt brown	M	Vfn/VC	Trace chert, silt.
145-150		sand	lt brown	C	Vfn/VC	Trace chert, silt.
150-155		sand	v lt brown	C	Vfn/VC	Trace gravel up to MP. Trace chert, silt.
155-160		sand	v lt brown	C	Vfn/VC	Trace gravel up to SP, silt.
160-165		sand	lt brown	C	Vfn/VC	Trace gravel up to Gr, chert.
165-170		gravel	mixed	SP	Gr/ LP	Much sand. Little silt.
170-175		sand	lt brown	C	Vfn/VC	Little gravel up to LP, silt.
175-180		sand	lt brown	C	Vfn/VC	Little gravel up to LP, silt.
180-185		sand	lt brown	C	Vfn/VC	Much gravel up to LP, silt.
185-190		sand	lt brown	C	Vfn/VC	Much gravel up to Gr, silt.
190-195		sand	lt brown	C	Vfn/VC	Trace gravel up to LP, silt.
195-200		sand	lt brown	C	Vfn/VC	Much gravel up to SP. Trace silt.
200-205		sand	lt brown	C	Vfn/VC	Much gravel up to MP. Trace silt.
205-210		gravel	mixed	LP	Gr/ LP	Little sand.
210-215		gravel	pink	LP	Gr/ LP	Predominantly quartzite gravel. Trace silt.
215-220		gravel	mixed	MP	Gr/ LP	Little sand, silt.
220-223		gravel	mixed	SP	Gr/ LP	Much sand. Little silt.
223-225		dolomite	light gray	M	M	Trace fossils. HCl test.
225-230		dolomite	light gray	M	M	Granular. Trace pyrite.
230-235		shale	light gray	--	--	Trace micaceous mineral in shale. HCl test.
235-240		shale	light gray	--	--	Trace micaceous mineral in shale.
240-245		shale	light gray	--	--	Trace micaceous mineral in shale.
245-250		shale	light gray	--	--	Trace micaceous mineral in shale. Little granular dolomite with pyrite.
250-255		dolomite	light gray	M	M	Very shaly (gray). Granular. Little pyrite, fossils.
255-260		dolomite	light gray	M	M	Very shaly. Granular. Little pyrite, fossils.
260-265		dolomite	light gray	M	M	Very shaly. Granular. Little pyrite, fossils. Trace brown chert.
265-270		dolomite	light gray	M	M	Granular. Trace pyrite, fossils.
270-275		dolomite	light gray	M	M	Shaly. Granular. Trace pyrite, fossils.
275-280		dolomite	light gray	M	M	Shaly. Granular. Trace fossils.

Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

The Native American Consultation Database (NACD) is a tool for identifying consultation contacts for Indian tribes, Alaska Native villages and corporations, and Native Hawaiian organizations. The database is not a comprehensive source of information, but it does provide a starting point for the consultation process by identifying tribal leaders and NAGPRA contacts. This database can be accessed online at the following web address <http://home.nps.gov/nacd/>

Environmental FirstSearch Descriptions

NPL: EPA NATIONAL PRIORITY LIST - The National Priorities List is a list of the worst hazardous waste sites that have been identified by Superfund. Sites are only put on the list after they have been scored using the Hazard Ranking System (HRS), and have been subjected to public comment. Any site on the NPL is eligible for cleanup using Superfund Trust money.

A Superfund site is any land in the United States that has been contaminated by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

FINAL - Currently on the Final NPL

PROPOSED - Proposed for NPL

NPL DELISTED: EPA NATIONAL PRIORITY LIST Subset - Database of delisted NPL sites. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

DELISTED - Deleted from the Final NPL

CERCLIS: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

PART OF NPL- Site is part of NPL site

DELETED - Deleted from the Final NPL

FINAL - Currently on the Final NPL

NOT PROPOSED - Not on the NPL

NOT VALID - Not Valid Site or Incident

PROPOSED - Proposed for NPL

REMOVED - Removed from Proposed NPL

SCAN PLAN - Pre-proposal Site

WITHDRAWN - Withdrawn

NFRAP: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM ARCHIVED SITES - database of Archive designated CERCLA sites that, to the best of EPA's knowledge, assessment has been completed and has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

NFRAP – No Further Remedial Action Plan

P - Site is part of NPL site

D - Deleted from the Final NPL

F - Currently on the Final NPL

N - Not on the NPL

O - Not Valid Site or Incident

P - Proposed for NPL

R - Removed from Proposed NPL

S - Pre-proposal Site

W – Withdrawn

RCRA COR ACT: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

RCRAInfo facilities that have reported violations and subject to corrective actions.

RCRA TSD: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that treat, store, dispose, or incinerate hazardous waste.

RCRA GEN: EPA/MA DEP/CT DEP RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that generate or transport hazardous waste or meet other RCRA requirements.

LGN - Large Quantity Generators

SGN - Small Quantity Generators

VGN – Conditionally Exempt Generator.

Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.

CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.

MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.

VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.

SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.

LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

RCRA NLR: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities not currently classified by the EPA but are still included in the RCRAInfo database. Reasons for non classification:

Failure to report in a timely matter.

No longer in business.

No longer in business at the listed address.

No longer generating hazardous waste materials in quantities which require reporting.

ERNS: EPA/NRC EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

Tribal Lands: DOA WISCONSIN NATIVE AMERICAN LANDS - database of all tribal lands in the state of Wisconsin derived from the U.S. Census Bureau 2000 TIGER line files.

Tribal Lands: DOI/BIA INDIAN LANDS OF THE UNITED STATES - Database of areas with boundaries

established by treaty, statute, and (or) executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are Federally-administered lands within a reservation which may or may not be considered part of the reservation.
BUREAU OF INDIAN AFFIARS CONTACT - Regional contact information for the Bureau of Indian Affairs offices.

State/Tribal Sites: *WI DNR* LIST OF HAZARD RANKING SITES - database of hazardous waste sites that was last revised 11/94. The data includes geology information, physical condition, site status and ranking

State Spills 90: *WI DNR* LISTING OF ALL SPILLS - database of spills reported to the Wisconsin Department of Natural resources. The data includes actions, impact and contact information.

State/Tribal SWL: *WI DNR* ACTIVE AND HISTORIC LICENSED SOLID WASTE LANDFILLS LIST - database of active and closed permitted solid waste landfills. The data includes information regarding site location and type.

State/Tribal LUST: *WI DNR* LISTING OF ALL LEAKING UNDERGROUND STORAGE TANKS - database of all leaking underground storage tanks reported to the Wisconsin Department of Natural Resources.

State/Tribal UST/AST: *WI DC* STORAGE TANK DATABASE - database of all registered underground and above ground storage tanks

State/Tribal EC: *WI DNR* BUREAU FOR REMEDIATION AND REDEVELOPMENT TRACKING SYSTEM (BRRTS) SUBSET – Database of all sites that have land use controls (LUC) for cap over contaminated areas. The data includes location, activity name and type, jurisdiction, start data, end date and comments.

State/Tribal IC: *WI DNR* BUREAU FOR REMEDIATION AND REDEVELOPMENT TRACKING SYSTEM (BRRTS) SUBSET – Database of all sites that have deed restrictions at closeout or land use controls (LUC) required at closure. The data includes location, activity name and type, jurisdiction, start data, end date and comments.

State/Tribal VCP: *WI DNR* VOLUNTARY PARTY LIABILITY EXEMPTION - is an elective environmental cleanup program. Any individual, business or unit of government that conducts an environmental investigation and cleanup of a contaminated property – following state requirements with the oversight of Department of Natural Resources (DNR) staff – can receive an exemption from future environmental liability. This liability exemption applies to releases of hazardous substances that occurred before the exemption is granted. Properties cleaned up through the VPLE process must conduct the environmental investigation and response actions in accordance with the same cleanup standards as any environmental cleanup conducted in Wisconsin

State/Tribal Brownfields: *COM DCD/ WI DNR* MILWAUKEE BROWNFIELDS REDEVELOPMENT SITE INVENTORY - database of mothballed (sites contaminated based on present and/or historical land uses) and tax-delinquent (sites that have not paid their property taxes for one or more years) brownfields in the City of Milwaukee.

BUREAU FOR REMEDIATION AND REDEVELOPMENT TRACKING SYSTEM (BRRTS) SUBSET – Database of Green Space and Public Facility Grants and Site Assessment Grant (SAG) Large and Small award. The data includes location, activity name and type, jurisdiction, start data, end date and comments.

NPDES: *EPA* THE NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM - Database of permitted facilities receiving and discharging effluents to and from a natural source where treatment of the effluent is monitored.

TRIS: *EPA* TOXIC RELEASE INVENTORY SYSTEM (TRIS)– Database that contains information on toxic chemical releases and other waste management activities reported annually by certain covered industry groups as well as federal facilities. This inventory was established under the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) and expanded by the Pollution Prevention Act of 1990.

RADON: *NTIS* NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon

project collected for a variety of zip codes across the United States.

State Other: *US DOJ* NATIONAL CLANDESTINE LABORATORY REGISTER - Database of addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the U.S. Department of Justice ("the Department"), and the Department has not verified the entry and does not guarantee its accuracy. All sites that are included in this data set will have an id that starts with NCLR.

State Other: *WI DNR* LISTING OF EMERGENCY REPAIR PROGRAM (ERP) SITES - database of non-LUST cleanup sites.

Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

The Native American Consultation Database (NACD) is a tool for identifying consultation contacts for Indian tribes, Alaska Native villages and corporations, and Native Hawaiian organizations. The database is not a comprehensive source of information, but it does provide a starting point for the consultation process by identifying tribal leaders and NAGPRA contacts. This database can be accessed online at the following web address <http://home.nps.gov/nacd/>

Environmental FirstSearch Descriptions

NPL: EPA NATIONAL PRIORITY LIST - The National Priorities List is a list of the worst hazardous waste sites that have been identified by Superfund. Sites are only put on the list after they have been scored using the Hazard Ranking System (HRS), and have been subjected to public comment. Any site on the NPL is eligible for cleanup using Superfund Trust money.

A Superfund site is any land in the United States that has been contaminated by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

FINAL - Currently on the Final NPL

PROPOSED - Proposed for NPL

NPL DELISTED: EPA NATIONAL PRIORITY LIST Subset - Database of delisted NPL sites. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

DELISTED - Deleted from the Final NPL

CERCLIS: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

PART OF NPL- Site is part of NPL site

DELETED - Deleted from the Final NPL

FINAL - Currently on the Final NPL

NOT PROPOSED - Not on the NPL

NOT VALID - Not Valid Site or Incident

PROPOSED - Proposed for NPL

REMOVED - Removed from Proposed NPL

SCAN PLAN - Pre-proposal Site

WITHDRAWN - Withdrawn

NFRAP: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM ARCHIVED SITES - database of Archive designated CERCLA sites that, to the best of EPA's knowledge, assessment has been completed and has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

NFRAP – No Further Remedial Action Plan

P - Site is part of NPL site

D - Deleted from the Final NPL

F - Currently on the Final NPL

N - Not on the NPL

O - Not Valid Site or Incident

P - Proposed for NPL

R - Removed from Proposed NPL

S - Pre-proposal Site

W – Withdrawn

RCRA COR ACT: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

RCRAInfo facilities that have reported violations and subject to corrective actions.

RCRA TSD: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that treat, store, dispose, or incinerate hazardous waste.

RCRA GEN: EPA/MA DEP/CT DEP RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that generate or transport hazardous waste or meet other RCRA requirements.

LGN - Large Quantity Generators

SGN - Small Quantity Generators

VGN – Conditionally Exempt Generator.

Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.

CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.

MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.

VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.

SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.

LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

RCRA NLR: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities not currently classified by the EPA but are still included in the RCRAInfo database. Reasons for non classification:

Failure to report in a timely matter.

No longer in business.

No longer in business at the listed address.

No longer generating hazardous waste materials in quantities which require reporting.

ERNS: EPA/NRC EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

Tribal Lands: DOI/BIA INDIAN LANDS OF THE UNITED STATES - Database of areas with boundaries established by treaty, statute, and (or) executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are

Federally-administered lands within a reservation which may or may not be considered part of the reservation.
BUREAU OF INDIAN AFFIARS CONTACT - Regional contact information for the Bureau of Indian Affairs offices.

Tribal Lands: DOA WISCONSIN NATIVE AMERICAN LANDS - database of all tribal lands in the state of Wisconsin derived from the U.S. Census Bureau 2000 TIGER line files.

State/Tribal Sites: WI DNR LIST OF HAZARD RANKING SITES - database of hazardous waste sites that was last revised 11/94. The data includes geology information, physical condition, site status and ranking

State Spills 90: WI DNR LISTING OF ALL SPILLS - database of spills reported to the Wisconsin Department of Natural resources. The data includes actions, impact and contact information.

State/Tribal SWL: WI DNR ACTIVE AND HISTORIC LICENSED SOLID WASTE LANDFILLS LIST - database of active and closed permitted solid waste landfills. The data includes information regarding site location and type.

State/Tribal LUST: WI DNR LISTING OF ALL LEAKING UNDERGROUND STORAGE TANKS - database of all leaking underground storage tanks reported to the Wisconsin Department of Natural Resources.

State/Tribal UST/AST: WI DC STORAGE TANK DATABASE - database of all registered underground and above ground storage tanks

State/Tribal EC: WI DNR BUREAU FOR REMEDIATION AND REDEVELOPMENT TRACKING SYSTEM (BRRTS) SUBSET – Database of all sites that have land use controls (LUC) for cap over contaminated areas. The data includes location, activity name and type, jurisdiction, start data, end date and comments.

State/Tribal IC: WI DNR BUREAU FOR REMEDIATION AND REDEVELOPMENT TRACKING SYSTEM (BRRTS) SUBSET – Database of all sites that have deed restrictions at closeout or land use controls (LUC) required at closure. The data includes location, activity name and type, jurisdiction, start data, end date and comments.

State/Tribal VCP: WI DNR VOLUNTARY PARTY LIABILITY EXEMPTION - is an elective environmental cleanup program. Any individual, business or unit of government that conducts an environmental investigation and cleanup of a contaminated property – following state requirements with the oversight of Department of Natural Resources (DNR) staff – can receive an exemption from future environmental liability. This liability exemption applies to releases of hazardous substances that occurred before the exemption is granted. Properties cleaned up through the VPLE process must conduct the environmental investigation and response actions in accordance with the same cleanup standards as any environmental cleanup conducted in Wisconsin

State/Tribal Brownfields: COM DCD/ WI DNR MILWAUKEE BROWNFIELDS REDEVELOPMENT SITE INVENTORY - database of mothballed (sites contaminated based on present and/or historical land uses) and tax-delinquent (sites that have not paid their property taxes for one or more years) brownfields in the City of Milwaukee.

BUREAU FOR REMEDIATION AND REDEVELOPMENT TRACKING SYSTEM (BRRTS) SUBSET – Database of Green Space and Public Facility Grants and Site Assessment Grant (SAG) Large and Small award. The data includes location, activity name and type, jurisdiction, start data, end date and comments.

Receptors: US DOC SENSITIVE RECEPTORS - 2005 Census Bureau's TIGER (Topologically Integrated Geographic Encoding and Referencing System) database of schools and hospitals. List of schools and hospitals that may house individuals deemed sensitive to environmental discharges due to their fragile immune systems.

HMIRS: US DOT HAZARDOUS MATERIALS INCIDENT RESPONSE SYSTEM - Database of information regarding materials, packaging, and a description of events for tracked incidents.

NCDB: EPA NATIONAL COMPLIANCE DATA BASE SYSTEM - Database of regional compliance and enforcement activity and manages the Pesticides and Toxic Substances Compliance and Enforcement program at a national level. The system tracks all compliance monitoring and enforcement activities from the time an

inspector conducts and inspection until the time the inspector closes or the case settles the enforcement action. NCDB is the national repository of the 10 regional and Headquarters FIFRA/TSCA Tracking System (FTTS). Data collected in the regional FTTS is transferred to NCDB to support the need for monitoring national performance of regional programs.

PADS: *EPA* DATABASE OF PCB HANDLERS - Database of PolyChlorinatedBiPhenol generators, transporters, storers and/or disposers that are required to register with the EPA. This database indicates the type of handler and registration number. Also included is the PCB Transformer Registration Database.

RADON: *NTIS* NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

Releases: *WI DNR* LISTING OF RELEASES - database of releases to air or water that have been extracted from the database of Spill Locations.

SETS PRP: *EPA* POTENTIALLY RESPONSIBLE PARTIES (PRP) – database of parties identified by the EPA as being potential responsible for contamination at a CERCLIS or NPL site.

State Other: *WI DNR* LISTING OF EMERGENCY REPAIR PROGRAM (ERP) SITES - database of non-LUST cleanup sites.

State Other: *US DOJ* NATIONAL CLANDESTINE LABORATORY REGISTER - Database of addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the U.S. Department of Justice ("the Department"), and the Department has not verified the entry and does not guarantee its accuracy. All sites that are included in this data set will have an id that starts with NCLR.

Meth Labs: *US DOJ* NATIONAL CLANDESTINE LABORATORY REGISTER - Database of addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the U.S. Department of Justice ("the Department"), and the Department has not verified the entry and does not guarantee its accuracy. All sites that are included in this data set will have an id that starts with NCLR.

HW Manifest: *WI DNR* HAZARDOUS WASTE MANIFEST DATABASE- Database of hazardous waste shipments to, from or within the state of Wisconsin. The data includes generator, transporter, TSD and waste information.

Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

Environmental FirstSearch Descriptions

NPL: EPA NATIONAL PRIORITY LIST - The National Priorities List is a list of the worst hazardous waste sites that have been identified by Superfund. Sites are only put on the list after they have been scored using the Hazard Ranking System (HRS), and have been subjected to public comment. Any site on the NPL is eligible for cleanup using Superfund Trust money.

A Superfund site is any land in the United States that has been contaminated by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

FINAL - Currently on the Final NPL

PROPOSED - Proposed for NPL

NPL DELISTED: EPA NATIONAL PRIORITY LIST Subset - Database of delisted NPL sites. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

DELISTED - Deleted from the Final NPL

CERCLIS: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

PART OF NPL- Site is part of NPL site

DELETED - Deleted from the Final NPL

FINAL - Currently on the Final NPL

NOT PROPOSED - Not on the NPL

NOT VALID - Not Valid Site or Incident

PROPOSED - Proposed for NPL

REMOVED - Removed from Proposed NPL

SCAN PLAN - Pre-proposal Site

WITHDRAWN - Withdrawn

NFRAP: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM ARCHIVED SITES - database of Archive designated CERCLA sites that, to the best of EPA's knowledge, assessment has been completed and has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

NFRAP – No Further Remedial Action Plan

P - Site is part of NPL site

D - Deleted from the Final NPL

F - Currently on the Final NPL

N - Not on the NPL

O - Not Valid Site or Incident

P - Proposed for NPL

R - Removed from Proposed NPL

S - Pre-proposal Site

W – Withdrawn

RCRA COR ACT: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

RCRAInfo facilities that have reported violations and subject to corrective actions.

RCRA TSD: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that treat, store, dispose, or incinerate hazardous waste.

RCRA GEN: EPA/MA DEP/CT DEP RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that generate or transport hazardous waste or meet other RCRA requirements.

LGN - Large Quantity Generators

SGN - Small Quantity Generators

VGN – Conditionally Exempt Generator.

Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.

CONNECTICUT HAZARDOUS WASTE MANIFEST – Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records.

MASSACHUSETTES HAZARDOUS WASTE GENERATOR – database of generators that are regulated under the MA DEP.

VQN-MA = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil.

SQN-MA = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil.

LQG-MA = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

RCRA NLR: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities not currently classified by the EPA but are still included in the RCRAInfo database. Reasons for non classification:

Failure to report in a timely matter.

No longer in business.

No longer in business at the listed address.

No longer generating hazardous waste materials in quantities which require reporting.

ERNS: EPA/NRC EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

Tribal Lands: DOI/BIA INDIAN LANDS OF THE UNITED STATES - Database of areas with boundaries established by treaty, statute, and (or) executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are

Federally-administered lands within a reservation which may or may not be considered part of the reservation.
BUREAU OF INDIAN AFFIARS CONTACT - Regional contact information for the Bureau of Indian Affairs offices.

Tribal Lands: *DOA* WISCONSIN NATIVE AMERICAN LANDS - database of all tribal lands in the state of Wisconsin derived from the U.S. Census Bureau 2000 TIGER line files.

State/Tribal Sites: *WI DNR* LIST OF HAZARD RANKING SITES - database of hazardous waste sites that was last revised 11/94. The data includes geology information, physical condition, site status and ranking

State Spills 90: *WI DNR* LISTING OF ALL SPILLS - database of spills reported to the Wisconsin Department of Natural resources. The data includes actions, impact and contact information.

State/Tribal SWL: *WI DNR* ACTIVE AND HISTORIC LICENSED SOLID WASTE LANDFILLS LIST - database of active and closed permitted solid waste landfills. The data includes information regarding site location and type.

State/Tribal LUST: *WI DNR* LISTING OF ALL LEAKING UNDERGROUND STORAGE TANKS - database of all leaking underground storage tanks reported to the Wisconsin Department of Natural Resources.

State/Tribal UST/AST: *WI DC* STORAGE TANK DATABASE - database of all registered underground and above ground storage tanks

State/Tribal EC: *WI DNR* BUREAU FOR REMEDIATION AND REDEVELOPMENT TRACKING SYSTEM (BRRTS) SUBSET – Database of all sites that have land use controls (LUC) for cap over contaminated areas. The data includes location, activity name and type, jurisdiction, start data, end date and comments.

State/Tribal IC: *WI DNR* BUREAU FOR REMEDIATION AND REDEVELOPMENT TRACKING SYSTEM (BRRTS) SUBSET – Database of all sites that have deed restrictions at closeout or land use controls (LUC) required at closure. The data includes location, activity name and type, jurisdiction, start data, end date and comments.

State/Tribal VCP: *WI DNR* VOLUNTARY PARTY LIABILITY EXEMPTION - is an elective environmental cleanup program. Any individual, business or unit of government that conducts an environmental investigation and cleanup of a contaminated property – following state requirements with the oversight of Department of Natural Resources (DNR) staff – can receive an exemption from future environmental liability. This liability exemption applies to releases of hazardous substances that occurred before the exemption is granted. Properties cleaned up through the VPLE process must conduct the environmental investigation and response actions in accordance with the same cleanup standards as any environmental cleanup conducted in Wisconsin

State/Tribal Brownfields: *COM DCD/ WI DNR* MILWAUKEE BROWNFIELDS REDEVELOPMENT SITE INVENTORY - database of mothballed (sites contaminated based on present and/or historical land uses) and tax-delinquent (sites that have not paid their property taxes for one or more years) brownfields in the City of Milwaukee.

BUREAU FOR REMEDIATION AND REDEVELOPMENT TRACKING SYSTEM (BRRTS) SUBSET – Database of Green Space and Public Facility Grants and Site Assessment Grant (SAG) Large and Small award. The data includes location, activity name and type, jurisdiction, start data, end date and comments.

RADON: *NTIS* NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

State Other: *WI DNR* LISTING OF EMERGENCY REPAIR PROGRAM (ERP) SITES -ERP sites are sites other than LUSTs that have contaminated soil and/or groundwater. Examples include industrial spills (or dumping) that need long term investigation, buried containers of hazardous substances, and closed landfills that have caused contamination. The ERP module includes petroleum contamination from above-ground (but not from underground) storage tanks.

Meth Labs: *US DOJ* NATIONAL CLANDESTINE LABORATORY REGISTER - Database of addresses of

some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the U.S. Department of Justice ("the Department"), and the Department has not verified the entry and does not guarantee its accuracy. All sites that are included in this data set will have an id that starts with NCLR.

HW Manifest: *WI DNR* HAZARDOUS WASTE MANIFEST DATABASE- Database of hazardous waste shipments to, from or within the state of Wisconsin. The data includes generator, transporter, TSD and waste information.
